

Parking Meter Cards

For the convenience of frequent downtown visitors, the Parking Services Division offers prepaid meter cards to avoid the hassle of making or carrying change while utilizing meters. The meter card is a small electronic card similar to a credit card which is inserted into a meter to load time on the meter. If you don't use all the time you put on the meter, simply reinsert your card and the remaining time is refunded!

Meter cards are available for purchase at the Parking Services Counter, located on the fourth floor of City Hall. The price of a meter card is \$1.00 for activation and you may purchase time in \$5.00 increments. Cards may be reloaded with more time as needed.

The current downtown parking meter rate is 60 cents per hour, which equates to a penny per minute. As an example:

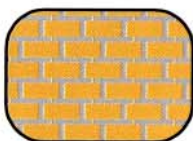

If you purchase \$30 worth of time for your meter card, you have 3,000 minutes of time on your card.

If you load a 2 hour meter using a meter card but return in only 1 hour, you will be refunded 60 cents worth of time, the same as 60 minutes.
