**Test Questions:**

1. When using bucket trucks, it's important to consider:
  - A. The integrity of the equipment
  - B. The hazards of the worksite
  - C. The potential for falls
  - D. All of the above
  
2. To avoid the risk of electric shock when working on or near high-voltage overhead energized lines, it is best to:
  - A. Check safety regulations for proper clearances and other recommended protective measures
  - B. Wear a hardhat
  - C. Wear rubber-soled shoes
  - D. Avoid contacting the lines when it is raining
  
3. It is safe to exceed the boom and basket load limits specified by the manufacturer of a bucket truck when:
  - A. The truck is on a stable surface
  - B. The load is balanced
  - C. The worker is wearing a personal fall arrest system
  - D. None of the above: it is never safe to exceed the recommended load limits
  
4. To help prevent falls when working from a bucket truck, it's best to:
  - A. Wear a hard hat
  - B. Wear climbers
  - C. Wear a safety harness and a lanyard attached to the boom or basket
  - D. Belt off to an adjacent pole, structure or equipment while working from the truck
  
5. TRUE or FALSE? When repositioning a bucket truck, it is safe to travel with a worker in the basket and the boom elevated?
