

# Historic Resources in the SEGA Area

A few talking points:

- *What price tag do we put on heritage?*
- *Is a "sense of place" important?*
- *What is "greener" than not tearing down an old building that can be adaptively reused?*
- *The most livable communities are a mix of old, and new.*
- *Historic resources include landscapes, canal systems, farm complexes as well as individual buildings.*
- *Environmental studies (EIRs) must consider the impacts to historic and cultural resources.*
