HELP THE CITY OF FRESNO DEVELOP A BICYCLE MASTER PLAN

The City of Fresno is in the process of transforming the City into a bicycle friendly community by leading the valley with one of the most progressive Bicycle Master Plans in the State of California if not the Nation. Our goal is to create a comprehensive network of multi-use trails, bike lanes, bike routes along with end user facilities such as bike racks, lockers, maps, and way finding signage to increase the ridership on bicycles throughout our region.

To develop the Bicycle Master Plan, we need to hear from the people that live, work, and play in the City of Fresno. Your thoughts and input are imperative to developing a Bicycle Master Plan that will have the most success. To get our community informed, interested, and on-board for the Bicycle Master Plan for the City of Fresno, three separate gatherings have been scheduled throughout the City to give everyone the opportunity to hear about the project, and also to give their input.

The overarching mission of the Bicycle Master Plan is to create a comprehensive, safe, and accessible bicycle system of multi-use trails, bike lanes, routes and other such facilities to effectively and efficiently connect cyclists with their destinations through quality encouragement, engineering, education, enforcement, and evaluation to create a much healthier community (air quality and physical fitness) and an enhanced quality of life for people that live, work, and play in Fresno.

Get out and enjoy the multi-use trails and bike lanes in Fresno! Bicycling is great cardio exercise, reduces emission and congestion caused by vehicles, and is a great way to experience Fresno and meet new people.

For more information please send an email to BMP@fresno.gov or call 559.621.8800.

The City has developed an easy on-line survey for people to also provide input so that we can best address the issues that face cyclists or potential cyclists in Fresno.

***To take the on-line survey, please visit:
