

Submittal Requirements for Temporary Use Permit

Required	<p>Please use this as a checklist to assemble the materials required for your development application when submitting the application in FAASTER. The following items must be submitted in order to process your application. <u>If the plans are not legible, or do not contain the information listed below, your application will be deemed incomplete and rejected.</u></p> <p>Please note that a temporary use permit only grants permission to allow certain uses on private property that otherwise are not permitted. Structures (including generators, tents and stages), mobile food vendors, street and alley closures and business licensing all require separate permit or application processes and separate application fees.</p>							
	<p>Instructions:</p> <ol style="list-style-type: none"> 1. All plans and documents <u>must</u> be uploaded in PDF format. 2. A separate PDF document is required for each plan type (i.e. separate PDF required for site plans, separate PDF for landscape plans, etc.). 3. Each plan type should only have one PDF uploaded (i.e. if there is more than one site plan exhibit, upload a multi-page PDF). 4. If FAASTER system requires a document type not included on this checklist, upload blank PDF document called "Dummy Document". Make sure you select the required document "Type" from the dropdown list.
