Being a safe pedestrian is very easy to do. Knowing how to be a good pedestrian will keep you safe while you walk to your destination. For example, it’s always best to walk on sidewalks or paths and cross at street corners, using traffic signals and crosswalks. And, you should always look left, right and left again before crossing any street.

There are two images below. The characters in the first image are being safe pedestrians. The characters in the second image are not being safe pedestrians. Can you spot the 3 unsafe behaviors in the second image? Draw a circle around them!
