PROJECT MANAGER

**DEFINITION**
Under direction, performs a variety of duties related to housing services, economic development, community development, redevelopment, historic preservation and/or development, public utilities projects and processes.

**SUPERVISION RECEIVED/EXERCISED**
Receives general administrative direction from the second tier management staff. Exercises supervision over professional, paraprofessional, technical, and administrative support staff as assigned.

**DISTINGUISHING CHARACTERISTIC**
Project Manager is a specialized class in which incumbents perform assignments under general direction and are responsible to plan, organize, administer, develop and implement strategies and policies related to the specific program assignment. Incumbents in this classification independently plan and carry out activities with minimal direction and exercise managerial responsibility and accountability for the City’s improvement projects; including independently setting project schedules, implementing compliance programs and troubleshooting project issues or negotiating development transactions. The Project Manager is responsible for establishing goals, analyzing situations accurately and adopting effective course of action.

**EXAMPLES OF IMPORTANT AND ESSENTIAL DUTIES**
(This classification exists in multiple City Departments therefore the below list is neither inclusive nor exclusive. Consequently, typical duties may include, but are not limited to the following;)

Supervises and participates in the work involved in developing housing projects including, but not limited to, affordable housing subdivisions, planned unit developments, in-fill housing, and single-room occupancies as well as the rehabilitation of existing housing.

Coordinates the implementation of public-sector projects with private-sector institutions, City departments, and other governmental agencies.

Develops programs and assures operational compliance with all local, state and federal community development, environmental, historic preservation, air emission and other applicable regulations.

Develops and implements new and innovative financing programs to enhance the effectiveness of City participation in efforts to revitalize targeted areas of the community.
Coordinates private and public involvement in housing finance programs, such as low income tax credit, tax-exempt applications and mortgage revenue bonds.

Develops and implements new processes to streamline the permit process and monitor the flow of permits and entitlements to make certain that processing time-lines are within acceptable limits.

Coordinates and provides advice on matters involving planning, community redevelopment, economic development, public infrastructure improvements, inspection, engineering, industrial, commercial, residential development, and air emission compliance.

Attends meetings of industry related professional associations, various boards and commissions; makes presentations and provides advice regarding their respective programs.

Administers, develops, and implements emission inventory, permitting, modeling and long range planning.

Researches and interprets new or pending program regulations, policies, practices and applicability to operations, and assesses new developments in technologies, industrial processes and equipment.

Develops and implements systems for monitoring and evaluating air emissions and legislation and other governmental actions related to air quality management planning.

Analyzes technical and policy issues, responds to inquiries, prepares and presents reports and recommendations before Council, governmental officials, public and private agencies, the public and other stakeholders.

Provides lead direction and advice to lower level staff.

Performs related duties as required.
