ASSOCIATE ELECTRICAL SAFETY CONSULTANT I

Class Definition
Under supervision, examines, evaluates, and approves Electrical installations in residential, commercial, and industrial buildings in accordance with the Electrical Regulations of the Fresno Municipal Code.

Distinguishing Characteristics
Associate Electrical Safety Consultant I is an advanced working level class in the Electrical Safety series. Incumbents examine, evaluate, and approve electrical installations in commercial and industrial buildings whose plans and specifications require the signature of a professional licensed by the State of California, and provide electrical consulting services to architects, engineers, designers, contractors, and owners. This class is distinguished from Electrical Safety Consultant I/II in that incumbents of the latter are restricted to examining, evaluating, and approving electrical installations in single and multi-family residential. This class is distinguished from Associate Electrical Safety Consultant II in that incumbents of the latter approve electrical installations in highly complex structures.
