

Pool Cover Rebate - \$50

City of Fresno customers may receive
up to a \$50 rebate for a new pool cover.

Save Energy and Water

Sometimes what may seem like a leak in your pool may actually be a high evaporation rate. A Pool Cover can help save 10,000 to 15,000 gallons of water each year by reducing evaporation. Evaporation of pool water can be expensive because it means not only replacing the water but buying more chemicals to treat the water. By limiting the effects of evaporation, Pool Covers can save you money and help maintain a comfortable water temperature thereby reducing energy usage.

Purchase a Pool Cover or Solar Pool Rings that conform to the size and shape of your pool and covers at least 85% of the pool surface area. Then follow the Pool Cover Rebate Program Guidelines and Conditions to receive rebate.
