## MAJOR EXPANSION OF FRESNO'S WATER SYSTEM NEARS COMPLETION

A major expansion of Fresno's water system will be completed this year, with start-up of the new state-of-the-art Southeast Surface Water Treatment Facility and pipelines that will allow use of additional surface water for the City's drinking water supply. This milestone will enable Fresno to achieve its long-term goal of becoming drought resilient by reducing dependence on groundwater and replenishing our aquifer.

The Southeast Surface Water Treatment Facility is the cornerstone of the City's Recharge Fresno Program and will treat 54 million gallons of water per day – and eventually up to 80 million gallons per day.

## A WATER MILESTONE FOR FRESNO

With the expansion of Fresno's water system, beginning this month, many water customers will receive a blend of treated surface water and groundwater.

To learn more about the water system expansion and the Recharge Fresno Program, please visit [www.RECHARGEFRESNO.com/watersupplytransition](http://www.RECHARGEFRESNO.com/watersupplytransition).
