

When in drought, **EVERY** drop counts.

In the City of Fresno, we're facing one of our **DRIEST** years yet. Reduce your water usage by 15% to help conserve.

- 1** Turn the water off when brushing your teeth.
- 2** Wait until the washing machine is full before starting your laundry.
- 3** Don't water every day and remember to set your sprinkler timers.

AVOID the Plumber & ENJOY the Summer!

The City of Fresno spends a lot of time and money clearing “flushable” products from pipes and pumps. To help avoid sanitary sewer overflows, always remember: if it’s not toilet paper, don’t flush it.
