The yield earned on the Portfolio was 1.01 percent for the month ended September 2015, and it was .69 percent for the month ended September 2014, a net increase of 32 basis points or 46.38 percent. The interest earned year to date has increased by \$562,673. The size of the Portfolio increased by \$30,084,052, an increase of 6.88 percent. The Market Value of the Portfolio increased by \$31,395,880. The difference between \$30,084,052 and \$31,395,880 is a decrease in the Deficiency of the Excess Market Value over the Book Value of \$1,029,966 and an increase in the Excess of the Market Value over the Book Value of \$281,862.

The increase in the size of the Portfolio is a result of a change in investment approach. The City's best estimate is that interest rates will rise slowly over the next five years, the horizon of the Portfolio. The best approach in this environment is to ensure that surplus funds are invested at all times in a range extending over that time horizon. As compared to one year ago, therefore, the Portfolio has increased by 6.88%, as more available surplus funds have been invested. Also, the average days to maturity has increased by approximately nine months.

In accordance with State Law, the Finance Director certifies that the securities held in the City Investment Portfolio, purchased with Surplus Funds, comply with City policies. The Finance Director further certifies that the City has Operating Funds available to meet its expenditure requirements for the next six months.

Amortized Cost - the total amount at which investments are carried on the City books. This amount includes the amortization and accretion of premiums and discounts, respectively.
