

ASSOCIATE ELECTRICAL SAFETY CONSULTANT II

Class Definition

Under supervision, examines, evaluates, and approves complex electrical installations in residential, commercial, and industrial buildings in accordance with the Electrical Regulations of the Fresno Municipal Code. Provides assistance to the Senior Electrical Safety Consultant in advising others on work methods and practices, assignment and dispatching of work, training, and field assistance to subordinates.

Distinguishing Characteristics

Associate Electrical Safety Consultant II is an advanced working level class in the Electrical Safety series. Incumbents examine, evaluate, and approve complex electrical installations in commercial and industrial buildings whose plans and specifications require the signature of a professional licensed by the State of California, and provide electrical consulting services to architects, engineers, designers, contractors, and owners. This class is distinguished from Associate Electrical Safety Consultant I in that incumbents of the latter do not assume the role of a lead worker while assisting the Senior Electrical Safety Consultant. This class is distinguished from Senior Electrical Safety Consultant in that incumbents of the latter are the first-line supervisory level in the Electrical Safety Consultant series.

Typical Tasks

(This list is neither inclusive nor exclusive. Consequently, this information may not reflect essential functions or cover all duties which may be assigned for this class.)
