

REGISTERED VETERINARY TECHNICIAN**DEFINITION**

Under general supervision, assists the Veterinarian in the medical care and treatment of animals; provides medical and surgical pre-operative and post-operative procedures for animals; and administers medications, examinations, and vaccines as directed by the veterinarian.

SUPERVISION RECEIVED/EXERCISED

Receives supervision from the Clinic Manager or designee. May provide supervision and/or lead direction to animal care staff and volunteers.

DISTINGUISHING CHARACTERISTICS

The Registered Veterinary Technician is a single class position that assists licensed Veterinarians in medical care and treatment of animals in the shelter as well as owned pets. The veterinary medical focus at the Animal Center is surgery, administering medications, performing examinations, administering vaccines and laboratory procedures, monitoring the use of medical equipment, sterilizing surgical instruments, and maintaining an inventory of medical and surgical supplies including medications.

Incumbents will be required to work nights, weekends and holidays and respond to after-hours emergencies as needed; will be exposed to a working environment with animals (primarily dogs and cats) which may lead to possible exposure of unpleasant odors and noises, allergens, interactions with animals, and possible exposure to zoonotic diseases; and will be required to handle and restrain animals humanely and safely using approved protocols and practices.

EXAMPLES OF IMPORTANT AND ESSENTIAL DUTIES

May include, but are not limited to, the following:

Assists the Veterinarian with medical examinations, surgeries and treatment of animals; performs physical examinations to evaluate the health of animals; administers emergency care, first aid and follow up to monitor animal health as prescribed by the Veterinarian.

Administers vaccinations, treatments, medications and microchips as prescribed and maintains records for each animal and enters data into the kennel management software system.

Assists the Veterinarian in performing surgeries including high volume spay/neuter; prepares and monitors animals for pre-operative and post-operative care.

Assists in handling and restraining animals humanely and safely using approved protocols, personal protective equipment (PPE) and practices including assisting in cleaning and disinfecting kennel areas, food dishes and equipment along with feeding

and exercising animals.

Administers the humane performance of euthanasia as medically necessary and provides training of euthanasia procedures to staff.

Assists with collecting laboratory specimens for testing as directed; ensures specimens are handled and disposed of in accordance with proper protocols and procedures.

Monitors the use of medical equipment and the use of medical supplies; tracks and reconciles inventory and use of controlled substances and medications.

Participates in animal center programs, clinics and events related to animal care and adoption.

Documents and maintains medical records such as exam findings, surgery information and treatments and enters into the kennel management software system.

Provides professional assistance in the investigation of mistreatment and neglect of animals including the examination of animals impounded for abuse.

Responds to inquiries from the public; maintains effective community relations; participates in special community events; advises/explains proper medical care and treatment of animals and pets; prepares reports and maintains records.

Assists with the development of policies and guidelines pertaining to the care, medical treatment and medical screening of animals, including euthanasia by injection, handling and restraint, vaccination and microchipping, and medical screening and provide training to Animal Care Staff in these areas as necessary.

May provide supervision and/or lead direction to animal care staff and volunteers.

Performs related duties as required.
