## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### RESEARCH SUMMARY

455 W. Fir Ave  
Clovis, CA 93611  
Contact: Stephanie Gillaspay

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Provost & Pritchard Eng. Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

# EDR BUILDING PERMIT REPORT

## About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

## ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

## Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

## EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Provost & Pritchard Eng. Group on Nov 12, 2021.

### **TARGET PROPERTY**

735 H Street  
Fresno, CA 93721

### **SEARCH METHODS**

EDR searches available lists for both the Target Property and Surrounding Properties.

### **RESEARCH SUMMARY**

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

### **Fresno**

Contractor Name: REX MOORE ELECTRICAL

## GLOSSARY

### General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

## GLOSSARY

### Permit Content Definitions

- Permit Number: The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

### Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Property Highlights

Based on the date of construction, URS requested an asbestos and lead-based paint survey from a private subcontractor, T. Brooks and Associates of Clovis, California, for the warehouse located on parcel APN 467-04-23ST (aka 735, 739, 741 H Street). The methodology and results of the survey are presented under separate cover and entitled Asbestos Survey & Lead-Based Paint Inspection Report, Commercial Structure 735, 739, & 741 "H" Street, Fresno, California, dated May 28, 2014. The survey concluded, in part, that 20 samples collected by Brooks for analysis included one or more samples which tested positive for asbestos in amounts greater than 1.0 percent. The samples testing positive included drywall taping mud and texture, drywall texture, wall paneling, 9-inch x 9-inch vinyl floor tile and associated mastic, and vibration damper. The survey concluded, in part, that the majority of testing combinations considered as part of Brooks' investigation were found to contain lead in some amount. A total of 47 testing combinations on the interior surfaces and 4 exterior surfaces were found to include lead in excess of 1.0 milligrams per square centimeter (mg/cm<sup>2</sup>) (0.5), (5,000 parts per million) and would be classified as "Lead-Based Paint" (LBP) under state and federal regulations.

**Former Use:** Based on a review of historical documents, parcel APN -20ST has been developed as a parking lot for commercial use since the late 1990s. Between the late 1980s and the late 1990s the parcel was vacant. Prior to the 1980s the parcel consisted of several railroad spur lines used to service lumber, paper, and produce warehouses located on parcels APN -22ST and -23ST. Parcel -22ST consisted of warehouses and commercial development until the early 1980s. The parcel was vacant in the 1980s and developed into a parking lot in the late 1990s. The warehouse currently occupying parcel APN -23ST is visible in aerial photographs back to at least 1946 and other historical documents back to at least 1885.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

### NOTES:

1. THE TOPOGRAPHIC SURVEY WAS PERFORMED ON JANUARY 5, 2022.
2. THE TOPOGRAPHIC SURVEY IS ONLY A PARTIAL SURVEY OF THE SPECIFIC PHYSICAL FEATURES OF THE SITE AND THEIR ELEVATIONS. NOT ALL AREAS OF WORK WERE INCLUDED IN THE TOPOGRAPHIC SURVEY.
3. THE SURFACE FEATURES OF THE UTILITIES SHOWN WERE OBTAINED AT THE TIME OF THE TOPOGRAPHIC SURVEY AND FROM A UTILITY SEARCH OF PLANS PROVIDED BY THE OWNER. IT IS POSSIBLE THAT ADDITIONAL UTILITIES MAY BE PRESENT THAT WERE NOT REVEALED THROUGH THE UTILITY SEARCH. NO GUARANTEE CAN BE MADE ON THE ACCURACY OR COMPLETENESS OF THE UTILITIES SHOWN.
4. THE EXISTENCE AND LOCATION OF ALL IMPROVEMENTS, UTILITIES, STRUCTURES, BUILDINGS, PARTY WALLS, PARKING STALLS, EASEMENTS, SERVITUDES AND ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE.

### BENCHMARK:

FRESNO CITY BENCHMARK NO. 743  
CHISELED SQUARE ON CURB, NORTHWEST RETURN, WEST CORNER OF "H" STREET AND MONO STREET.  
ELEVATION = 290.488'

### SITE BENCHMARK:

AME POINT NO. 1  
SET NAIL AND SHINER ON PAVEMENT, 69' SOUTH OF SOUTHEAST CORNER OF WAREHOUSE AND 110' SOUTHWEST CORNER OF LIGHT POLE AT SOUTHWEST SIDE OF WAREHOUSE.

ND	None Detected
NESHAP	National Emissions Standard Hazardous Air Pollutants
NIOSH	National Institute for Occupational Safety and Health
NIST	National Institute of Science and Technology
NVLAP	National Voluntary Laboratory Accreditation Program
PLM	Polarized Light Microscopy
TEM	Transmission Electron Microscopy
TTLC	Total Threshold Limit Concentration

## Executive Summary

Forensic Analytical Consulting Services, Inc. (FACS) was retained by TAM + CZ Architects, Inc. to perform an asbestos inspection of a City of Fresno-owned warehouse, located at 725 H Street in Fresno, California. The survey included any suspect asbestos-containing materials (ACM) which may be disturbed during an upcoming renovation project at the warehouse. A summary list of suspect asbestos-containing materials which were identified and sampled is included in Appendix A of this report. The survey was performed on December 22, 2021.

### Asbestos

The following suspect materials were sampled and identified to **contain** asbestos by laboratory analysis during this survey:

- 12" VFT – Marble
- 12" VFT – Pink
- 3'x3' Floor Tile – Black
- 9" VFT – Tan Oatmeal
- Aircell
- Drywall – Skip Trowel Texture
- Drywall – Smooth Texture
- Flooring Material - Black Vinyl
- Transite Panels
- Vibration Dampener
- 9" VFT – Black

While lab results do not reflect all drywall materials as containing asbestos, it is recommended that all drywall containing a paint or texture finish be handled as asbestos-containing. This is due to the random nature of the drywall systems in the building and determining exactly where one system that contains asbestos may stop or start. Handling all drywall as asbestos-containing would remove the potential for an improper disturbance of the material during renovation activities.

Please see Appendix A for a complete listing of materials sampled at the work areas and results during this survey. Any suspect materials not included must be assumed to be asbestos-containing materials until tested and proven not to contain asbestos. FACS recommends that the results of this report be incorporated into any renovation plans provided for this project for informational purposes.

## Introduction

Forensic Analytical Consulting Services, Inc. (FACS) was retained by TAM + CZ Architects, Inc. to perform an asbestos inspection of a City of Fresno-owned warehouse, located at 725 H Street in Fresno, California. The survey was conducted prior to potential renovation activities in the near future. The survey was performed on December 22, 2021.

## Scope of Work

The purpose of this survey was to identify asbestos-containing materials (ACMs) which may be disturbed during the upcoming project. The visual inspection, bulk sampling, and survey documentation were performed by Chris Chipponeri. Mr. Chipponeri is a Division of Occupational Safety and Health (DOSH) Certified Asbestos Consultant (CAC #10-4633) as required under California regulations. The scope of the survey and the services provided by FACS included:

- Performing a visual inspection of the project areas to identify accessible suspect asbestos-containing materials (ACMs) that will be disturbed during the planned project;
- Collection of bulk material samples for asbestos analysis by polarized light microscopy (PLM);
- Ensuring the technical quality of all work by using Asbestos Hazard Emergency Response Act (AHERA) accredited Building Inspectors;
- Consolidating data and findings into a report format.

## Site Characterization

The warehouse at 735 H Street in Fresno, California is a multi-level industrial building comprising a main floor, a sub level, and a limited upper level. The main floor includes 3 large warehouse bays, as well as office space and storage. The sub level is comprised of two disconnected basements with street access. The upper level consists of an office overlooking one warehouse floor, and attic space housing the building's HVAC system.

## Survey Methods

### Document Review

FACS has no prior survey or site inspection for this location.

### Visual Inspection

Accessible building materials were visually inspected using the methods presented in the Federal AHERA regulations (40 CFR, Part 763). AHERA inspection methodology is required to be used for inspections of K-12 schools and is generally accepted as the industry standard for all ACM inspections regardless of structure or facility type. Suspect ACMs were also physically assessed for friability, condition and possible disturbance factors.

All areas were accessible during this inspection. This inspection excluded the roof area of the building and additional survey for suspect materials would need to be performed of this area prior to any renovation activities.

## Asbestos Inspection

### Bulk Sample Collection

Bulk samples of identified homogeneous materials were collected in building areas that may be impacted by the planned renovation/demolition activities. Samples were collected of each separate homogeneous area. A homogeneous area is defined as a surfacing material, thermal system insulation, or miscellaneous material that is uniform in use, color, and texture. Examples of homogeneous areas could include:

- Vinyl floor tiles
- False ceiling panels
- Drywall with joint compound
- Vinyl sheet flooring

The specific number of samples collected was determined by using the methods required by the Federal AHERA regulations (40 CFR, Part 763.86) as noted below:

- 1) For Surfacing Material:
  - 1,000 ft<sup>2</sup> or less - collect 3 samples
  - 1,001 to 5,000 ft<sup>2</sup> - collect 5 samples
  - 5,001 ft<sup>2</sup> or greater - collect 7 samples
- 2) For Thermal System Insulation:
  - "In a randomly distributed manner" - collect 3 samples
  - 6 linear feet of patching or less - collect 1 sample
  - cementitious pipe fittings - "In a manner sufficient to determine"
- 3) For all Miscellaneous Material:
  - Collect samples "In a manner sufficient to determine whether material is ACM (asbestos-containing material) or not ACM..."

The suspect ACMs were sampled using a knife, chisel, scraper, drill or other similar coring device suitable to the type of material sampled to cut through its entire thickness and to ensure that a cross-section of the material was obtained. The material was then placed in an appropriately labeled container that was sealed and submitted to SGS-Forensic Laboratories for analysis. A unique sample number (e.g. PJ65200-01A) was assigned to each sample.

Bulk samples will be retained by the laboratory for one month unless otherwise instructed. After this period, the samples will be disposed of appropriately.

### Bulk Sample Analysis

A total of ninety-six (96) bulk samples were collected from a total of forty-seven (47) suspect materials. Bulk samples were analyzed by SGS-Forensic Laboratories (SGS-FL) in Hayward, California. SGS-FL is accredited by the California Department of Public Health (CDPH) Environmental Laboratory Accreditation Program (ELAP) and the National Institute of Science and Technology's (NIST) National Voluntary Laboratory Accreditation Program (NVLAP). SGS-FL participates in the National Institute for Occupational Safety and Health (NIOSH) Proficiency Analytical Testing Program and has substantial experience in the analysis of asbestos.

All samples were analyzed using Polarized Light Microscopy with Dispersion Staining (PLM/DS) techniques in accordance with the methodology approved by the U.S. Environmental Protection Agency (EPA). The percentage of asbestos present in the samples was determined on the basis of a visual area

estimation. The EPA defines asbestos-containing materials (ACM) as any material containing more than one percent (1%) asbestos as determined using the method specified in Appendix A, Subpart F, 40 CFR Part 763, Section 1, Polarized Light Microscopy (PLM). 40 CFR Part 763 identifies the lower limit of reliable quantification for asbestos using the PLM method as approximately one percent (1%) by volume. Regulations in California (CAL/OSHA Title 8 CCR 1529) define asbestos-containing construction materials (ACCM) as those materials having asbestos content of greater than one tenth of one percent (> 0.1%); therefore, for the purpose of this survey, any amount of asbestos detected will be considered positive. In addition to the percentages, the types of asbestos minerals are also reported. The PLM method is the standard method used to analyze asbestos bulk samples.

When "None Detected" (ND) appears in the laboratory results, it should be interpreted as meaning asbestos was not observed in the sample material.

## Regulations

### Background

Asbestos is the name of a class of magnesium-silicate minerals that occur in fibrous form. Minerals that are included in this group are chrysotile, crocidolite, amosite, anthophyllite asbestos, tremolite asbestos, and actinolite asbestos. Although the chrysotile minerals are the most common type of asbestos found in the construction industry, all types of asbestos are regulated in the same manner. Asbestos has been used in more than 3,000 different building materials. Asbestos was added to building materials to: increase fire-resistance, insulate against heat, cold and sound, resist corrosion, and increase tensile strength. Common building materials that may contain asbestos include but are not limited to the following: floor tile, resilient sheet flooring, ceiling tile, mastics, roofing materials, fireproofing, acoustical treatments, wallboard, pipe and boiler insulations. Adverse health effects have been associated with the inhalation of airborne asbestos. However, asbestos fibers that are tightly bound in the building material, may not represent an exposure hazard, unless disturbed in such a way that releases airborne fibers (i.e., cutting, drilling, sanding, and other abrasive methods).

### Building Surveys

The following is a summary of some current Federal and California State regulations which contain requirements related to the performance of building surveys for asbestos. These summaries are not intended to be all inclusive and do not contain every aspect of the regulations discussed.

#### U.S. EPA National Emission Standard for Hazardous Air Pollutants (NESHAPs), 40 CFR Part 61

Under the NESHAPs regulation, no visible emissions are allowed during building demolition or renovation activities which involve regulated asbestos-containing materials. For this reason, all buildings must be surveyed for asbestos-containing materials prior to demolition or renovation. The EPA, CARB, and/or the local Air Quality Management District which implements EPA actions, must be notified prior to any building demolition even if no asbestos-containing materials are present.

Regulated asbestos-containing material (RACM) is defined as a) any friable material with an asbestos content of greater than one percent, or b) any non-friable material with asbestos content of greater than one percent that will, or could, become friable.

#### Asbestos Hazard Emergency Response Act (AHERA), 40 CFR Part 763, Subpart E

AHERA requires performance of asbestos surveys and the development of Asbestos Management Plans for all primary and secondary schools in the United States. Although this regulation applies to primary and secondary schools only, the procedures mandated under AHERA are considered the industry

standard and are applied to all surveys performed by FACS unless otherwise specified by the building owner.

## Worker Protection

### California Assembly Bill AB3713, Health and Safety Code Division 20, Chapter 10.4, Section 25915-25924

The state of California has enacted legislation that requires building owners, employers, lessees, etc. to notify tenants, employees and contractors of the presence of asbestos in both friable and non-friable forms. In addition, preventive maintenance activities must be developed and communicated to these parties. Notification is required 15 days after the identification of ACM in the building, and annually thereafter.

### Occupational Safety and Health Administration (OSHA) 29 CFR 1926.1101 and 8 CCR 1529

The Federal and State Occupational Safety and Health Administrations (OSHA) require employers to implement specific work practices which protect workers from airborne asbestos exposure.

Building materials which contain even low levels of asbestos (<1%) can potentially generate significant concentrations of airborne asbestos fibers when disturbed. Therefore, control measures should be instituted which adequately address worker health and safety during planned renovation or demolition activities involving these materials. Cal/OSHA defines asbestos-containing construction materials as those materials having greater than one tenth of one percent asbestos (>0.1%). As stated previously, there is currently no viable method to accurately quantify asbestos at this level.

## Hazardous Waste

Building materials reported to contain less than one percent (<1%) of asbestos are not considered hazardous by the U.S. EPA, and hence, may not require removal and disposal prior to demolition or renovation. Regulations may vary, however, between regional air quality management districts and/or other state agencies responsible for implementing EPA's rules. Therefore, local agencies should be contacted for specific ACM definitions and handling requirements. Cal/OSHA may also require special packaging and labeling on containers with asbestos-containing construction materials.

Composite sampling, which may potentially reduce the total asbestos content of the material, is only permitted when sampling joint compound, tape, and gypsum wallboard according to EPA's Asbestos NESHAP Clarification Regarding Analysis of Multi-Layered Systems (40 CFR Part 61 FRL-4821-7).

## Findings and Recommendations

Forensic Analytical Consulting Services, Inc. (FACS) was retained by TAM + CZ Architects, Inc. to perform an asbestos inspection of a City of Fresno-owned warehouse prior to a potential renovation.

The following suspect materials were sampled and identified to **contain** asbestos by laboratory analysis during this survey:

- 12" VFT – Marble
- 12" VFT – Pink
- 3'x3' Floor Tile – Black
- 9" VFT – Tan Oatmeal
- Aircell
- Drywall – Skip Trowel Texture
- Drywall – Smooth Texture
- Flooring Material - Black Vinyl
- Transite Panels
- Vibration Dampener
- 9" VFT – Black

While lab results do not reflect all drywall materials as containing asbestos, it is recommended that all drywall containing a paint or texture finish be handled as asbestos-containing. This is due to the random nature of the drywall systems in the building and determining exactly where one system that contains asbestos may stop or start. Handling all drywall as asbestos-containing would remove the potential for an improper disturbance of the material during renovation activities.

Please see Appendix A for a complete listing of materials sampled at the work areas and results during this survey. Any suspect materials not included must be assumed to be asbestos-containing materials until tested and proven not to contain asbestos.

The US EPA National Emissions Standard for Hazardous Air Pollutants (NESHAP) regulation, as enforced by the San Joaquin Valley Air Pollution Control District (SJVAPCD), requires the abatement of materials that contain more than 1% asbestos if they are friable or are likely to become friable by forces disturbing them. Materials noted as being friable, or would be considered friable when removed, include Aircell insulation, vibration dampened, and drywall materials. While not friable, the removal of asbestos-containing vinyl floor materials should be performed prior to renovation activities to prevent the improper disturbance of materials.

If more than 160 square or 260 linear feet of regulated asbestos-containing material (RACM) will be abated, or if non-friable materials will be removed using mechanical means exceeding these thresholds, a 10-working day notification will need to be filed with the SJVAPCD, along with the payment of necessary fees that are based on quantities of materials to be removed. If materials identified as non-friable are not to be removed using mechanical means, a 10-working day notification is not required, but a courtesy notification should be filed at least 24 hours prior to abatement commencing with the SJVAPCD.

For friable materials and non-friable materials that are removed using mechanical means or made friable by removal methods, the materials shall be disposed of as hazardous (regulated) asbestos-containing waste materials. Non-friable materials that remain non-friable during removal can be disposed of as a non-hazardous asbestos-containing waste material.

The contractor performing removal shall follow all Cal/OSHA abatement work practices and engineering controls for the class of work being performed. The contractor will need to submit a notification for the abatement at least 24 hours prior to the start of abatement to the local Cal/OSHA office. If the contractor will be removing more than 100 square feet of material, they must be registered with Cal/OSHA as an asbestos abatement contractor. Workers will also need to have AHERA Worker training with one worker trained to the AHERA Contractor-Supervisor level.

To comply with California State License Board requirements, the contractor performing the abatement will need to hold the C-22 asbestos abatement license or the C-class specialty license for each trade work to be performed with asbestos certification for that specialty class. Since more than two trades of work is involved in abatement, the abatement contractor may also hold the B-class general license with asbestos certification.

FACS recommends that the results of this report be incorporated into any renovation plans provided for this project for informational purposes.

## Limitations

This investigation is limited to the conditions and practices observed, and information made available to FACS. The methods, conclusions and recommendations provided are based on FACS' judgment, expertise and the standard of practice for professional service. They are subject to the limitations and variability inherent in the methodology employed. As with all environmental investigations, this

investigation is limited to the defined scope and does not purport to set forth all hazards, nor indicate that other hazards do not exist.

Please do not hesitate to contact our office at 209-551-2000 with any questions or concerns. Thank you for the opportunity to assist TAM+CZ Architects with promoting worker safety and a healthy environment.

Respectfully,

Modesto CA 95350

Dear Certified Asbestos Consultant or Technician:

Enclosed is your certification card. **To maintain your certification, you must abide by the rules printed on the back of the certification card.**

Your certification is valid for a period of one year. If you wish to renew your certification, you must apply for renewal at least 60 days before the expiration date shown on your card. [8 CCR 341.15(h)(1)].

Please hold and do not send copies of your required AHERA refresher renewal certificates to our office until you apply for renewal of your certification.

Certificates must be kept current if you are actively working as a CAC or CSST. The grace period is only for those who are not actively working as an asbestos consultant or site surveillance technician.

Please notify our office via U.S. Postal Service or other carrier of any changes in your mailing or work address within 15 days of the change.

Sincerely,

Jeff Ferrell  
Senior Safety Engineer

PRELIMINARY STRUCTURAL  
ASSESSMENT REPORT

Mr. Rod Andreasen, Project Architect  
Temple Andersen Moore Architects  
6781 N. Palm Ave, Suite 120  
Fresno, CA 93704

February 16, 2022

## **PRELIMINARY STRUCTURAL ASSESSMENT REPORT**

Client: Temple Andersen Moore Architects

RE: H St. Building - Preliminary structural assessment of an existing building for future occupancy options

Facility: Vacant warehouse type building  
Location: Northwest corner of H St. and Mono St., Fresno, CA  
Owner: City of Fresno, CA  
Engineer: Provost & Pritchard Consulting Group – Parrish Hansen Division  
Project Manager: Robert S. Parrish, S.E.  
PH File No.: 02984-21-006

### **OBJECTIVE**

The objective of this report is to provide the Client and Owner with information describing the type of construction, condition of materials, and code compliance issues related to occupancy category changes for re-use of the facility. Inspections are limited to cursory observations of the interior and exterior of the building without destructive efforts to expose materials not open to view. The information provided in this report is strictly related to the building structural systems and materials. No material identifications and testings are to be performed at this phase of assessment.

This report has been prepared for the use of the Client, Owner and any party authorized by either for the purpose of the intended services. This report shall not be used by any other party, or for any other purpose without the written consent of this Engineer.

### **LIMITATIONS**

Inasmuch as it is understood by all parties to this effort that the Engineer is providing structural engineering evaluation services based on limited observations of the existing conditions, the comments, findings, and opinions expressed in this report are subject to further verification by analysis, detailed inspection, and material testing in order to gain increased confidence for determining the appropriate application of the information as related to future proposed occupancy options. Where assumptions of material type and strength are required to perform structural evaluations, assumptions are generally

made in general conformance to the most expected material type and grade that would have been used at the time of construction.

In the case of this building there is no information available to estimate the time of construction of various portions of the building structure. In that consideration, for the purpose of this assessment, materials are assumed as follows:

Wood: Construction Grade Doug-Fir.

Glu-lam: 1600F Doug-Fir.

Steel: Grade 30KSI.

Bolts: Grade 8.

Clay brick:  $f'm = 1,000$  psi

Concrete:  $f'c = 2,000$  psi

No assumptions have been made to include higher than normal strengths of materials.

## **OBSERVATIONS**

The building is a single-story construction with two basement spaces. The building is approximately 405 ft. long in the north-south dimension, and 50.5 ft. wide in the east-west dimension. One basement area is at the south end of the building and measures approximately 47 ft. x 47 ft. interior clear dimension between walls. The other basement is in the center portion of the building and measures 47 ft. wide x 100 ft. long clear between the walls.

The building roof construction is wood-framed with 2x4 joists (sub-purlins) @ 24" o.c. spacings, spanning between 4x14 solid wood purlins @ 8'-0" o.c. spacings. The purlins span between glued-laminated, tapered girders @ 24 ft. o.c. spacings, and between glued-laminated girder and the end masonry exterior walls at the north and south ends. The girders are supported within pockets through the upper extension walls at the east and west sides and extend through the wall extending as a cantilever for the east and west side overhangs.

The above grade exterior walls of the building are constructed of red clay brick in a two-wythe alternating pattern with what measures to be 8 1/2" long x 3 3/4" wide brick units with a mortar joint of 1/2" thickness, resulting in a wall thickness of 12 3/4" to 13". The brick portion of the walls is approximately 14 ft tall at the south section of the building and 16 ft. tall at the north end section. Bricks were laid in a 'header course', or 'king row' pattern at every 7 to 8 courses up the height of the brick portion of wall. These courses are for the purpose of 'tying' the inner and outer brick wythe course together and are an indication that the brick wall is unreinforced (no reinforcing steel).

Above the brick portion of the wall there is, what appears to be either a concrete wall section, or a framed wall with plaster coating each side. This section of wall is

approximately 6 ft. tall at the north section of the building, and 8 ft. tall at the south section of the building and extends to the roof deck. This section of the wall appears to have been added to the top of the original brick wall to extend the height of the building roof evidenced by the original roofline impression at the north end wall. There has been no official information provided explaining the reason for this extension to the brick wall, and access was not available to reach the height of the wall to attempt to determine what construction type was installed.

The basement walls are completely sub-terranean and similar to the above-grade walls in that construction consists of unreinforced clay brick of multi-wythe construction. The thickness of the basement walls could not be determined; however, it is expected that the thickness is greater than the above grade walls due to the function of the basement walls for soil retention. The basement walls also exhibited 'header coursing' indicating unreinforced brick construction.

The floor framing over the basements is of diagonal wood sheathing spanning to the wood joists @ 16" o.c., which are supported by wood post and beam construction. The floors over the basement areas are covered over the top surface with steel plate for an unknown reason, other than it would be expected that previous occupancy may have involved heavy loading conditions such as material storage or vehicle traffic.

Beam supports to the posts are of varying types of bearings and attachments. The basement at the north end appeared to have wood posts that were added after the original construction, with bearing blocks set directly on the basement floor slab, while the original posts are setting on various bearing blocks of wood spreaders set on grout and brick pads. Whether there were footings under the basement floor slabs at the original posts could not be verified.

The east side of the building has a raised concrete loading dock slab that extends to H St. with no shoulder at the traffic lane. The loading dock is level with the interior floor slab of the building. The support wall for the loading dock slab is an unreinforced brick wall at H St.

## **OBSERVATIONS & DISCUSSIONS**

### Roof framing –

Observations of the roof framing indicated that some water infiltration had occurred in the interior portion at the north end as there is a section of roof where the plywood sheathing and joists had been replaced. Other locations were observed that indicate moisture damage may exist at the top of the roof sheathing. The exterior roof, especially at the east side, exhibited signs of moisture infiltration damage significant enough to suspect that fungal decay has occurred in the roof decking and framing. There are several locations where the east fascia beam is completely rotted and breaking loose of the

supporting beams. The roof structure is supporting only the weight of the roof structural components, as no insulation, ceiling, mechanical or electrical materials exists.

Refer to the 'Assessments' portion of this report for results of a preliminary load analysis of the structural roof components.

Above-grade exterior walls –

Throughout the entire building there are significant occurrences of extreme exfoliation of the interior and exterior surfaces of the bricks leaving piles of 'red-dust' and 'lamellar crusts' at the bottom of the walls. This type of exfoliation is due to deterioration of the brick material caused by years of moisture infiltration through the walls, evaporating from the wall surfaces, which occurs primarily at the lower courses of the wall where the exterior soil is moist and wicks up the exterior wall surface. The degree of exfoliation that was observed is extreme, and irreparable, indicative of an extremely long period of moisture exposure. In addition, the mortar joints in the lower portions of the walls are also highly deteriorated, even to the point of being completely missing from the joints, also due to exfoliation.

The most curious structural aspect of the building is the 6 ft. and 8 ft. high extension of the exterior wall, which occurs around the entire perimeter of the building. There are indications that the roof had been positioned at or near the top of the brick portion of the wall when originally constructed. It was suggested in a discussion at the site, although not verified, that the building had experienced a fire in the past that destroyed a major portion of the roof, and when the roof was re-built the roof height was raised by adding these extensions on top of the original brick wall. However, and for whatever reason the wall was increased in height, it is expected that the upper extension portion of the walls is of unreinforced concrete and results in a 38% to 60% increase in the original wall height, depending on which section of the building is being considered. This amount of height increase would result in a 90% to 150% increase in the stress level of the original wall when subjected to out-of-plane wind or seismic loads. This is an extreme increase in seismic/wind risk from the original intended construction.

Observations around the perimeter of the roof at the top of the concrete portion of the wall do not exhibit any 'out-of-plane' ties (connectors) or in-plane shear transfers, except that there are steel clip angles each side of the girders on the exterior face of the wall. This method of anchorage of the walls to the roof would be considered extremely minimal and not adding any significant strength to the seismic resisting integrity of the wall-to-roof connection.

Basement walls –

The brick and mortar materials of the basement walls are also extremely deteriorated exhibiting extreme exfoliation; however, the exfoliation is over the entire height of the

walls as these walls are soil retaining and constantly exposed to moist soil conditions over the full height. There are many locations where the mortar is completely missing from the joints. The surrounding mortar joints and brick units could easily be scraped away with a screwdriver.

#### Footings –

There are no portions of the perimeter of the building that were not covered by concrete pavement. Therefore, no observations could be made of the footings below the above grade structural walls. To provide for observations of the footing systems concrete slabs would need to be removed alongside portions of the building where the basements do not occur and saw cutting of the interior basement slabs would be required to remove soil alongside the wall for observation of the basement footings.

Considering the type of brick construction of the above-grade and basement walls, and the vintage of original construction, it is anticipated that the footing system is a ‘stacked’ brick footing which would consist of layers of bricks widening with each layer to create a soil bearing width. Considering the degree of deterioration observed in the building and basement wall brick and mortar, it would be expected that the brick footings would have also experienced significant deterioration due to constant exposure to damp soil.

#### Ground floor –

The ground floor appeared to be concrete slab where the basements did not occur. These slab surfaces could not be observed due to the steel plate coverings.

The floors over the basement are wood-framed as described, however, it is curious that the north end basement has had posts added at some point after the original construction, reducing the floor beam spans to 50% of their original spans. There is also a section of the basement where joist framing that had experienced consecutive floor joist failure and had been repaired with doubler joists and a strongback spreader. There are some other areas where splitting of the joists has occurred. Some of these locations have not been repaired, and others have been repaired with various types of remediation methods indicating that failures had been occurring over a significant period of time.

#### Loading dock –

The loading dock concrete slab appeared to be reasonably level, however exhibiting significant conditions of cracking. The retaining wall at the H St. edge was constructed of unreinforced brick and covered over with a cement coating. The cement coating is highly deteriorated and much of the coating has spalled away leaving the brick exposed. There is a high degree of green moss on the surface of the brick and the bricks are extremely deteriorated.

## ASSESSMENTS

### Roof Framing –

An analysis of the structural stresses of the roof framing components was performed using only the ‘assumed’ possible existing material weights, and assuming the grades of wood materials as described in this report. The results of the analyses are as described:

#### 2x4 joists:

Assumed roof material weight –		
Roofing (assumes built-up roof with re-cap)	=	6.0 psf
Plywood (5/8”)	=	2.0 psf
2x4 joists	=	<u>0.7 psf</u>
	=	8.7 psf
Code required live load	=	20.0 psf

Under the assumed grade of material, dead weight loads and required design live loads the joists are overstressed by approximately 15% (1.15) of allowable stress limit, which indicates that the joists cannot sustain any added load for future remodeling.

#### 4x14 purlins:

Assumed roof material weight –		
Joist analysis weight (above)	=	8.7 psf
Purlin weight	=	1.5 psf
Misc.	=	<u>0.5 psf</u>
		10.7 psf
Code required live load	=	20.0 psf

Under the assumed grade of material, dead weight loads and required design live loads the purlins are overstressed by approximately 90% (1.90) of allowable stress limit, which indicates that the joists cannot sustain any added load for future remodeling, and if subjected to the required design loads, would be approaching stress levels close to expected material failure for new material, causing more concern in consideration of the age of the wood purlins.

#### Glued-laminated girders:

Assumed roof material weight –		
Purlin analysis weight (above)	=	10.7 psf
Girder weight	=	<u>40.0 plf</u>
		297.0 plf

Under the assumed grade of material, dead weight loads and required design live loads the girders are overstressed by approximately 30% (1.30) of allowable stress limit, which indicates that the girders cannot sustain any added load for future remodeling.

Keeping in mind that the material species and grade levels are 'assumed' minimum stress levels that could have been used for the original construction materials, the roof framing system does not appear to be capable of supporting any added loads, should the addition of materials be required for any proposed future use.

#### Exterior walls –

Based on the type of unreinforced brick construction originally constructed to a height of 14 ft. and 16 ft., and considering the added extension of a 6 ft. and 8 ft. high concrete wall extending the walls to approximately +22 ft. above the floor elevation, the strength capacity of the wall would need to be evaluated for gravity, wind and seismic load considerations in order to establish a level of stress relative to strength. This analysis would require wall materials (brick and mortar) to be sampled and tested to establish allowable brick strengths, mortar strengths, and in-place shear strengths. These tests would need to be performed by a material testing agency.

However, the degree of brick and mortar deterioration at the lower portions of the above-grade walls is a telltale indication that the brick and mortar strengths throughout these areas will not be adequate enough to satisfy the minimum requirements for testing. The degree of deterioration of these lower level materials is far too extreme. Faces of the bricks are completely exfoliated and piles of brick and mortar dust occur at the base of the walls indicating a long-term period of deterioration resulting from moisture infiltration and evaporation.

#### Basement walls –

As discussed above for the above-grade walls, the basement walls are at a greater level of deterioration involving the brick and mortar materials, and deterioration occurs over the full height of the walls. The deterioration is so extreme that bricks and mortar are completely missing, not from being removed, but from the materials completely deteriorating into brick and mortar dust as can be seen in the piles of dust at the bottom of the walls on the floor slab.

There are some locations observed where the floor beams and header lintels over openings are bearing on brick pilasters and wall jambs where brick and mortar are completely missing below the beams.

#### Interior floors –

The interior wood framed floors over the basements should be evaluated for the capacity to support the intended occupancy live loads. All remediations of floor joist failures should be evaluated for the effectiveness of the repairs..

#### Exterior loading dock –

The loading dock slab is assumed to be a concrete slab-on-fill soil and would require replacement of many portions due to cracking conditions. The loading dock retainment wall at H St. should be removed and replaced due to the extreme degree of deterioration of the brick and mortar.

#### Gravity-load resistance –

As has been discussed previously in this report, the roof framing system cannot receive any additional material weight due to the existing stress levels analyzed under the building code requirements for dead and live loads. However, the results of the analysis should be understood that a live load does not currently exist, and that there does not appear to be any reason to suspect that failures would occur under the current dead loading condition. Those areas of damage and current failure are an exception and need to be remediated.

Although the existing framing is ‘legacied’ (grandfathered), the stress level results from our analyses are concerning, and at least warrant upgrading of the 4x purlins regardless of the future use of the building. It is also a recommendation that live loads (personnel access) be limited to this roof.

This is to say, however, that personnel should not be allowed to access the roof without understanding that a risk level exceeding the minimum code requirements does exist.

In consideration of the level of deterioration of the above-grade walls, it is expected that proper repair of the deteriorated brick and mortar would be extremely expensive, however, under gravity loading these walls do tend to distribute loads through better portions of the walls limiting the risk of an abrupt wall failure.

The basement walls are a different category of risk as they support the above-grade walls and floor beams and are depending on the remaining integrity of highly deteriorated brick and mortar for support. Considering the extreme degree of deterioration of these walls it is unpredictable when an abrupt local failure could occur involving loss of support of a floor beam, or the caving in of a portion of the exterior retainment wall. Replacement of these walls would be extremely expensive as the walls would need to be replaced in their entirety, or otherwise remediated with the installation of new reinforced concrete walls at the interior faces and modified supports for support of the above-grade walls and floor beams.

#### Lateral-load resistance –

The assessments of materials of the structural system have been described above for the local effects of gravity load conditions. However, a structural system relies on all parts of the structural system to be properly functioning for the effective resistance to lateral loads such as seismic (earthquake) activity and wind pressures. In the consideration of the conditions of this building there are many concerns for the seismic/wind resistance of the existing structural system.

This is a large ‘open-space’ building with ‘heavy mass’ unreinforced brick walls, minimal plywood roof diaphragm, and many openings in the east and south exterior walls. In addition, there does not exist any measurable connection between the exterior walls and the roof framing. Each of these characteristics alone are considered problematic for lateral-load resistance of a building. The combination of these characteristics provides for the worst case scenario for lateral-load resistance and establishes such minimal level of resistance to lateral loads, especially seismic activity, that this structure would be considered extremely ‘unsafe’ and at ‘high risk’ of collapse in the event of a minor to moderate seismic event.

Plywood roof sheathing resisting the lateral forces of thick masonry brick walls are subject to failure if not installed with the proper thickness, blocked edges, nailing, and limited diaphragm spans (distances between walls) creating diaphragm stiffness sufficient to limit deflections and distortions of the brick walls under seismic activity. In addition, the brick walls would require substantial connection to the roof, developed into the diaphragm to prevent the walls from pulling away from the roof resulting in roof and wall collapse. The integrity of the brick and mortar materials is important for the resistance of both in-plane and out-of-plane shear forces as these materials, when in a deteriorated state, will be subject to crumbling, again possibly resulting in roof and wall collapse.

The south end of the building has very little brick wall available for lateral load resistance as most of the length of the wall includes areas of large openings. The headers of these opening are inlaid into the brick piers further limiting their effective resistance to lateral shear loads even more. This wall would be expected to fail under minor levels of seismic forces.

The east wall is similar to the south wall in that there are many large openings along its length, and significant deterioration of the lower courses of brick. To compound the issue, the above-grade walls bear on top of the basement walls, relying on the extremely deteriorated basement walls for lateral-load shear transfers to the foundation/soil.

Based in this engineer’s experience with evaluation of buildings subjected to seismic damage it is my opinion that this building could experience significant structural damage at a Richter level 4 event, and catastrophic damage, including collapse, at a Richter level 5 event.

## CONCLUSIONS

Conclusions can only be made based on the owner's expectation for the structural performance of the existing building considering the owner's intent for public safety and the potential occupancy types for continued use. Assuming the new occupancy category keeps the building within the same 'Risk Category' as currently assigned, per Table 1604.5 of the California Building Code (CBC), structural remediations of certain conditions are required by the building code due to deficiencies and deteriorations; and structural upgrades, regardless of what is required by the building code, can be made voluntarily. Otherwise, if the new occupancy should put the building into a higher Risk Category, then the entire building would need to be brought into compliance with the building code as for new construction, including options for the application of the ASCE 41 methods for rehabilitation.

This being an existing building of significant age, unreinforced brick constructions, significant brick and mortar deteriorations, significant deficiencies in roof framing capability, and extreme deficiencies in resistance to seismic and wind forces, the questions that need to be answered are:

- What extent of remediation and code upgrade is required by the building codes based on the existing structural conditions, within the current building's Risk Category?
- What extent of public safety is desired for the intended occupancy that would warrant additional voluntary structural upgrades, without a change in the building's Risk Category?
- Will the intended Change of Occupancy require compliance with the Existing Building Code for structural upgrades due to a change in the building's Risk Category?
- Are there intended modifications to the building structure to accommodate the new occupancy which will trigger code compliance with affected portions of the structure?

In an attempt to provide answers to the above options, it should first be understood that, in the opinion of this engineer, the findings of this evaluation define the building as 'extremely dangerous' due to a combination of the many structural characteristics and conditions as noted above. This opinion is based on the historical experience of buildings of this type of construction when subjected to seismic activity, as unreinforced buildings without adequate wall-to-roof connections are the 'worst' of combined conditions for seismic resistance and are highly susceptible to collapse.

In the case of this building, the unreinforced character of the walls is only one character weakness, compounded by the level of brick and mortar deterioration, minimal diaphragm strength,

minimal wall pier at the south wall, absence of wall-to-roof connections and deficient capability of the roof structural components.

In consideration of these combinations of the characteristics it is this engineer's opinion that the remediations and upgrades required by the building code due solely to the existing structural deficiencies and deteriorations, without consideration of voluntary upgrades to enhance public safety, would cost considerably more than the replacement of this building with a new, similar type of construction. However, to evaluate the cost of required remediations and upgrades, in-place evaluations from a materials testing agency, and a masonry repair contractor would be required as this type of repair/replacement of brick masonry is a specialty construction and involves maintaining the support of the building walls above.

If the intent in the re-use of this building is to achieve a public safety performance level that would include an upgrade of the building's seismic/wind resisting system, then the combined cost of such rehabilitation along with the required remediations and upgrades would be that much more than replacement of the building and would not have achieved the level of seismic/wind resistance as a new structural system.

According to the California Existing Building Code, Appendix A, the purpose of this code section is for the strengthening of unreinforced masonry buildings, however, compliance with this code "will not necessarily prevent loss of life or injury or prevent earthquake damage to retrofitted buildings, as defined in the following code Section:

#### **Chapter A1 Seismic Strengthening Provisions for Unreinforced Masonry Bearing Wall Buildings**

##### **Section A101 Purpose**

##### **[BS] A101.1 Purpose**

**The purpose of this chapter is to promote public safety and welfare by reducing the risk of death or injury from the effects of earthquakes on existing unreinforced masonry bearing wall buildings.**

**The provisions of this chapter are intended as minimum standards for structural seismic resistance, and are established primarily to reduce the risk of life loss or injury. Compliance with these provisions will not necessarily prevent loss of life or injury or prevent earthquake damage to retrofitted buildings.**

To develop a scope of rehabilitation and cost estimate for this building the following information will be required:

- Establish an Occupancy Category for the proposed use of the building to determine if the Risk Category will change.
- Establish a level of public safety to be achieved in the upgrading and retrofitting of the building. (This is a subjective level of upgrade to be discussed with the owner.)
- Determine what, if any, modifications to the existing structure will be required by code specification for the new occupancy.

It is our hope that this preliminary assessment report covers enough information regarding the existing building descriptions and conditions to evaluate the potential for re-use of the building.

If you should have any questions regarding the information provided in this report please call my office.

Respectfully,

Robert S. Parrish  
Structural Engineer  
(S2331-CA)  
Project Manager

ESTIMATES &  
PROPOSALS

June 15, 2022

TAM+CZ Project #2122-C  
2122C-letter of proposal.doc

TAM

**LETTER OF PROPOSAL AND AGREEMENT  
CITY OF FRESNO  
735 H STREET FARMER'S MARKET**

**TO:** City of Fresno -Public Works Department  
Facilities Management Division  
Attention: Nathan Sanchez  
Supervising Engineering Tech

**FROM:** Rod Andreasen, Architect/AIA  
Partner

This Proposal is made pursuant to discussions with the **City of Fresno**, and shall become the Agreement to provide the services described whit in part A, when an executed copy is returned to Temple Andersen Moore Architects, LLP (Architect).

**DESCRIPTION OF PROJECT**

Provide demolition plans for removing the existing warehouse building at the corner of H Street and Inyo and grading back to a dirt lot.

**DESCRIPTION OF ARCHITECTURAL/ENGINEERING SERVICES**

**A. SCOPE OF SERVICES:**

1. Phases of A/E Work:
  - a. Construction Demolition Documents: Prepare detailed drawings and specifications.
  - b. Construction Phase: A/E to be available to coordinate, clarify documents, resolve construction problems,
2. Coordination of Design Work: Architect to continuously coordinate and cooperate thru the Design Phases.
3. TAM+CZ to provide the following design team required to render services on the project:
  - a. TAM+CZ Principal-in-Charge: *Rod Andreasen, Architect/AIA*  
TAM Project Manager: *Fernando Martinez, Associate*

- b. Structural: *(Not a Part of this Proposal)*
- c. Electrical: *(Not a Part of this Proposal)*
- d. Mechanical: *(Not a Part of this Proposal)*
- e. Civil (Site Demo): *Alan Mok Engineering*
- f. Hazardous Materials Survey: Forensic Analytical Consulting Services, Inc.
- g. Other special consultants may be needed; if so, TAM will provide a fee proposal for Client authorization.

## B COMPENSATION:

1. The herein agreed basic architectural services shall be compensated on an **Hourly** Basis with an estimated total in the amount of **Twelve Thousand Five Hundred and 00/100 Dollars (\$12,500.00)**.
2. The following shall qualify for reimbursement to the Architect at actual cost plus 15%:
  - a. Additional scope of work for consultant services approved by the City.
  - b. Reproduction of documents for Owner, Consultants and Contractor review, and for plan check and construction.
  - c. Fees advanced by TAM to governmental agencies for plan check or other purposes.
  - d. Out-of-town travel expenses including mileage, meals and accommodations.
  - e. Next day air packages.
  - f. Special Consultant's fees authorized by City of Fresno.
3. Any Scope of Services not listed as Basic Services, specifically identified as Additional Services shall be compensated per TAM 2022 Hourly Rate Schedule (*attached*) or a negotiated Fixed Fee.
4. Architect to be paid on a monthly basis, upon submission of billings.
5. Any work deviating from the "Included Work" (Scope of Work)" as outlined above will be considered additional services. A written agreement by both parties and modification to the contract will be required prior to proceeding with any additional services.

**C. TO BE PROVIDED BY OWNER:**

- 1. Project Inspection
- 2. Laboratory testing and inspection.
- 3. All governmental agency fees.
- 4. Project direction via an authorized City of Fresno representative.

**D. MISCELLANEOUS:**

- 1. Schedule: as mutually agreed by the Parties.
- 2. Initiation of A/E Services: Upon authorization by Owner.
- 3. Architect to maintain \$1 million coverage for Professional Liability Insurance, and engineering consultants to likewise maintain such insurance.

**E. TERMINATION OF SERVICES:**

This agreement may be terminated by the Client or the Firm should the other fail to perform its obligations hereunder. In the event of termination, the Client shall pay the Firm for all services rendered to the date of termination, all reimbursable expenses, and reimbursable termination expenses.

## **DEMOLITION ESTIMATES FOR 735 H STREET FARMER'S MARKET**

**TO:** City of Fresno -Public Works Department  
Facilities Management Division  
Attention: Nathan Sanchez  
Supervising Engineering Tech

**FROM:** Rod Andreasen, Architect/AIA  
Partner

This Estimate is made pursuant to discussions with the **City of Fresno**, and shall serve only as a reference for potential costs of construction services thereof.

### **DESCRIPTION OF DEMOLITION COST ESTIMATE**

#### **A. SCOPE OF SERVICES:**

1. Demolition of the building is complicated by the age of the building, the soft nature of the unreinforced brick materials and the addition of the reinforced concrete upper structure. This addition was added to increase the height of the building walls in the 1960's. The roofing materials are assumed (by the age - 1960's) to be asbestos containing and must be abated prior to the demolition of the roof structure. The wood roof structure can be recycled, as can the concrete. The brick is no longer able to be recycled as road base (Caltrans specifications for AB and ASB). The basement areas are included for backfill. Pad graded to be flush at approximately the mid-point of the existing building.

A. Budget: \$509,000.00

\*All Budget recommendations are as of June 2022, with no additions for future escalation.

Phase I Environmental Site Assessment  
735, 739, and 741 H Street, Fresno, California

Description History:		Based on a review of historical documents, parcel APN -20ST has been developed as a parking lot for commercial use since the late 1990s. Between the late 1980s and the late 1990s the parcel was vacant. Prior to the 1980s the parcel consisted of several railroad spur lines used to service lumber, paper, and produce warehouses located on parcels APN -22ST and -23ST. Parcel -22ST consisted of warehouses and commercial development until the early 1980s. The parcel was vacant in the 1980s and developed into a parking lot in the late 1990s. The warehouse currently occupying parcel APN -23ST is visible in aerial photographs back to at least 1946 and other historical documents back to at least 1885.				
Ready for Reuse Ind:		No

Description History:					In 1918, the subject property parcel contained Zibbell's Auto Exchange Garage in the general configuration as the present day structure. In 1948, the subject property parcel contained a wholesale beer distributorship, apparently part of the Richter Bottling Company located to the southeast. In 1950, the subject property parcel contained an auto brake shop. The subject property was identified with several different auto parts stores up to 2008, when the Fresno RDA took possession and the current tenant, Pool Tables R Us, occupied the site.	
Ready for Reuse Ind:	No

<b>Site History:</b>						

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities"

<b>Description History:</b>		Based on review of historical documents, the subject property appears to have been located in an area of downtown Fresno urban development dating back to 1885. The first developments occurred in the forms of private residences in about 1888. The subject property was occupied by single-family residences and boarding houses with stables through the early 1900s giving way to retail and commercial development during the mid-1900s. By the mid-1960s, all the structures had been removed and the site was developed as a paved parking facility similar to present-day configuration.				
		This assessment identified no Recognized Environmental Conditions (RECs) in connection with the subject property.				
		For the reasons discussed in Section 8.2 of the ESA, it is URS' opinion that there is a low likelihood that significant environmental liability exists regulated to the New York Hatters – Hat Cleaners and Blockers, or Victor Kuljian, clothes cleaner; and additionally it is URS' opinion that there is a low likelihood that significant environmental liability exists regulated to the presence of lead-based paint on the subject property parcel as a result of sloughing from neighboring site structure and no further investigations appear warranted.				
<b>Ready for Reuse Ind:</b>		No

<b>Site History:</b>			

The case was opened following an unauthorized release from an underground storage tank system at the subject site. The case was referred to CVRWQCB by Fresno County Environmental Health Division on 2/22/2008. CVRWQCB has directed a preliminary site investigation. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted

<b>Gndwater Monitoring Freque:</b>			
<b>Designated Beneficial Use Desc:</b>	Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply, Water Contact Recreation, Non-Contact Water Recreation		
<b>Site History:</b>			

The case was opened following an unauthorized release from an underground storage tank system at the subject site. The case was referred to CVRWQCB by Fresno County Environmental Health Division on 2/22/2008. CVRWQCB has directed a preliminary site investigation. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted

<b>Site History:</b>						

Sample results from beneath the underground storage tank indicate that an unauthorized release of fuel oil petroleum hydrocarbons occurred. Jurisdiction for clean up oversight belongs to the Regional Water Quality Control Board, Central Valley Region, Fresno office. The case will be referred to the Board as soon as possible for further action.

RB Case No:	5T10000919	Potential COC:	Heating Oil / Fuel Oil, Naphthalene, Total Petroleum Hydrocarbons (TPH)
Local Case No:		How Discovered:	
Begin Date:	10/8/2014	Stop Method:	
Lead Agency:	CENTRAL VALLEY RWQCB (REGION 5F)	Stop Description:	
Local Agency:		Case Worker:	MLE
CUF Case:	NO	Military DoD Site:	No
CalEnvScreen Score:	96-100% (highest scores)	Leak Reported Dt:	2014-10-21 00:00:00
EPA Region:	9	No Further Action Dt:	2015-08-11 00:00:00
Qty Risd Gallons:			
Potential Media of Concern:	Aquifer used for drinking water supply, Indoor Air, Soil, Soil Vapor		
How Discovered Description:			
Calwater Watershed Name:	South Valley Floor - Fresno (551.30)		
DWR GW Subbasin Name:	San Joaquin Valley - Kings (5-022.08)		
Disadvantaged Community:			
Coordinate Source:	Google Map Move		
Discharge Cause:	Unknown		
Discharge Source:	Tank		
File Location:	Regional Board		
Site History:			

The subject property (Site) is currently vacant, but was formerly occupied by a warehouse used by a packing company. While conducting excavation for

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

development, a previously unknown underground storage tank (UST) was exposed. The UST was calculated to have a capacity of approximately 1,000 gallons, and was nearly full of product, which was judged to be fuel oil. The oil was removed and disposed of properly. After removal of the UST, a soil sample was collected at 8 feet below ground surface (bgs) from the former UST location. Subsequent laboratory analysis of the soil sample indicated total petroleum hydrocarbons diesel range constituents (TPHd) at 410 milligrams per kilogram (mg/kg), and total petroleum hydrocarbons motor oil range constituents (TPHmo) at 3,100 mg/kg. Subsequent soil investigations performed between November 2014 and February 2015 determined that the extent of hydrocarbon impacted soil is confined to within the Site boundaries. The zone of impact is within an elliptical area with a maximum extent of 100 feet long and 65 feet wide, and between the depths of 15 to 45 feet bgs. The contamination is primarily heavier hydrocarbons constituents (TPHmo and TPHd) characteristic of fuel oil. Based on the TPHmo concentrations detected, and the estimated area of impacted soil at each depth, approximately 11,700 pounds (about 1,680 gallons) of fuel oil remain within the impacted soil. Groundwater is no shallower than 90 feet bgs beneath the Site, resulting in a buffer of approximately 45 feet of clean soil between the contamination and groundwater. Petroleum constituents that remain in soil beneath the Site should continue to degrade naturally, and pose no significant threat to human health and safety, the environment or groundwater beneath the Site. The case satisfies the criteria of the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy, adopted 1 May 2012.

**Site History:**

The subject property (Site) is currently vacant, but was formerly occupied by a warehouse used by a packing company.

While conducting excavation for development, a previously unknown underground storage tank (UST) was exposed. The UST was calculated to have a capacity of approximately 1,000 gallons, and was nearly full of product, which was judged to be fuel oil. The oil was removed and disposed of properly. After removal of the UST, a soil sample was collected at 8 feet below ground surface (bgs) from the former UST location. Subsequent laboratory analysis of the soil sample indicated total petroleum hydrocarbons diesel range constituents (TPHd) at 410 milligrams per kilogram (mg/kg), and total petroleum hydrocarbons motor oil range constituents (TPHmo) at 3,100 mg/kg.

Subsequent soil investigations performed between November 2014 and February 2015 determined that the extent of hydrocarbon impacted soil is confined to within the Site boundaries. The zone of impact is within an elliptical area with a maximum extent of 100 feet long and 65 feet wide, and between the depths of 15 to 45 feet bgs. The contamination is primarily heavier hydrocarbons constituents (TPHmo and TPHd) characteristic of fuel oil. Based on the TPHmo concentrations detected, and the estimated area of impacted soil at each depth, approximately 11,700 pounds (about 1,680 gallons) of fuel oil remain within the impacted soil. Groundwater is no shallower than 90 feet bgs beneath the Site, resulting in a buffer of approximately 45 feet of clean soil between the contamination and groundwater.

Petroleum constituents that remain in soil beneath the Site should continue to degrade naturally, and pose no significant threat to human health and safety, the environment or groundwater beneath the Site. The case satisfies the criteria of the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy, adopted 1 May 2012.

This is the second underground storage tank (UST) found and removed from the former Kalashian Packing Company site. This second UST was removed under permit from the County of Fresno Department of Public Health on April 8, 2009. Sample Results from beneath the UST indicated that an unauthorized release of diesel, and oil and grease petroleum hydrocarbons occurred. Jurisdiction for cleanup oversight belongs with the Regional Water Quality Control Board, Central Valley Region Fresno. The case will be referred the the Board as soon as possible for further action. Case referred. Impacted soil removed during UST removal. Very low concentrations in samples collected below UST, unlikely to threaten human health and the environment. Case closed.

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

**Site History:**

PG&E began manufacturing gas on this site in 1883 using coal to gas methods. Between 1890 and 1892, the coal-gas plant was dismantled and replaced with two oil burning water-gas generators. The plant was shut down in 1919. This site has been switched to a Voluntary Cleanup (60001247) and no longer needs attention or evaluation.

**Status:** INACTIVE - NEEDS EVALUATION  
**Program Type:** EVALUATION

RB Case No:	5T10000177	Potential COC:	Heating Oil / Fuel Oil
Local Case No:	FA0266637	How Discovered:	Tank Closure
Begin Date:	6/13/1989	Stop Method:	Close and Remove Tank
Lead Agency:	CENTRAL VALLEY RWQCB (REGION 5F)	Stop Description:	
Local Agency:		Case Worker:	MLE
CUF Case:	YES	Military DoD Site:	No
CalEnvScreen Score:	96-100% (highest scores)	Leak Reported Dt:	2016-06-20 00:00:00
EPA Region:	9	No Further Action Dt:	2019-03-22 00:00:00
Qty Risd Gallons:			
Potential Media of Concern:	Aquifer used for drinking water supply		
How Discovered Description:			
Calwater Watershed Name:	South Valley Floor - Fresno (551.30)		
DWR GW Subbasin Name:	San Joaquin Valley - Kings (5-022.08)		
Disadvantaged Community:	Severely Disadvantaged Community		
Coordinate Source:	Google Geocode		
Discharge Cause:	Unknown		
Discharge Source:	Tank		
File Location:	Regional Board		
Site History:			

On 4 September 2015, two underground storage tanks (USTs) were removed from the subject address (Site). Analytical results of soil samples collected from beneath the USTs detected concentrations of petroleum hydrocarbon constituents. Considered evidence of a release of petroleum products from the USTs, the Fresno County Environmental Health Division (FCEHD) issued an Underground Storage Tank Unauthorized Release (Leak) / Contaminated Site Report on 20 June 2016. On 21 June 2016, the FCEHD referred the Site to the Central Valley Regional Water Quality Control Board (Central Valley Water Board) for regulatory oversight.

**Site History:**

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

FORMER FRESNO 2  
MANUFACTURED GAS PLANT  
SITE  
MARIPOSA STREET BETWEEN F  
AND G STREETS  
FRESNO CA 93701

ENVIROSTOR

**Estor/EPA ID:** 60001247  
**Site Code:** 102076, 100303  
**Nat Priority List:** NO  
**APN:** NONE SPECIFIED  
**Census Tract:** 6019000300  
**Site Type:** VOLUNTARY AGREEMENT  
**Address Description:** MARIPOSA STREET BETWEEN F AND G STREETS  
**Office:** ENGINEERING & SPECIAL PROJECTS  
**Special Program:** VOLUNTARY AGREEMENT - STANDARD VOLUNTARY AGREEMENT  
**Funding:** SITE PROPONENT

**Assembly District:** 31  
**Senate District:** 14  
**Permit Renewal Lead:**  
**Public Partici Spclst:**  
**Project Manager:** JOSEPH TAPIA  
**County:** FRESNO  
**Latitude:** 36.7313  
**Longitude:** -119.7953  
**Acres:** 1.2 ACRES  
**Supervisor:** JOSEPH TAPIA

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

**Cleanup Status:** ACTIVE AS OF 2/9/2010  
**Cleanup Oversight Agencies:** DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY  
**School District:**  
**Past Use that Caused Contam:** MANUFACTURED GAS PLANT  
**Potential Media Affected:** SOIL, SOIL VAPOR  
**Potential Contaminant of Concern:**

CYANIDE (HYDROGEN)  
 METALS  
 PETROLEUM  
 POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)

**Site History:**

The site operated as a coal-gas facility from 1892 until 1919. This project consists of four parcels. Contaminants of potential concern include PAHs, TPH (gas, diesel, motor oil), heavy metals, VOCs and cyanide.

**Status:** ACTIVE  
**Program Type:** VOLUNTARY CLEANUP  
**CalEnviroScreen Score:** 95-100%

**Case Worker:** PBD  
**Military DoD Site:** No  
**Leak Reported Dt:** 1994-04-01 00:00:00  
**No Further Action Dt:**

The Site is located at 1152 G Street in Fresno. The Site was historically used, from 1965 to 1986, to store bulk tetrachloroethene (PCE) in an aboveground storage tank at the northern section of the property. Soil and soil vapor surveys in 1996 indicated the presence of PCE. Several monitoring wells were installed in 1996 and showed PCE in the underlying groundwater. In 1998 a vapor extraction system was installed and ran until 2004. The extracted soil vapor is treated using two 2500-pound activated carbon vessels to remove the VOCs. Through subsequent testing a series of groundwater monitoring wells have been installed and continue to be monitored quarterly. Four new offsite SVE wells were installed during late 2008 and the SVE system. An SVE system is currently extracting soil vapors from five vapor extraction wells located near the highest concentrations of PCE in groundwater and soil. This is located just downgradient of the site. Investigation to assess the lateral and vertical extent of impacts to groundwater is ongoing. Univar installed a remediation system to inject potassium permanganate into groundwater beneath the source area. Two injection events have been conducted. No further injection events are anticipated.

**Site History:**

The Site is located at 1152 G Street in Fresno. The Site was historically used, from 1965 to 1986, to store bulk tetrachloroethene (PCE) in an aboveground storage tank at the northern section of the property. Soil and soil vapor surveys in 1996 indicated the presence of PCE. Several monitoring wells were installed in 1996 and showed PCE in the underlying groundwater. In 1998 a vapor extraction system was installed and ran until 2004. The extracted soil vapor is treated using two 2500-pound activated carbon vessels to remove the VOCs. Through subsequent testing a series of groundwater monitoring wells have been installed and continue to be monitored quarterly.

Four new offsite SVE wells were installed during late 2008 and the SVE system. An SVE system is currently extracting soil vapors from five vapor extraction wells located near the highest concentrations of PCE in groundwater and soil. This is located just downgradient of the site. Investigation to assess the lateral and vertical extent of impacts to groundwater is ongoing. Univar installed a remediation system to inject potassium permanganate into groundwater beneath the source area. Two injection events have been conducted. No further injection events are anticipated.

**Sites from GeoTracker Search - Cleanup Action Report**

**Action Type:** SOIL VAPOR EXTRACTION (SVE)  
**Phase:** Other (See Description)  
**Description:** Soil vapor extraction system installed and operational at beginning of November 2009. System is installed offsite and downgradient of the former source area. Onsite source was previously remediated using SVE.  
**Contaminant Mass Removed:**  
**Begin Date:** 11/1/2009  
**End Date:**

COPPER AND COMPOUNDS  
 TPH-GAS  
 VANADIUM AND COMPOUNDS

**Site History:**

The 0.25-acre site was first developed as early as early as 1898 and used as an electrical substation beginning in 1937. The site was deactivated in 1983 and has been vacant since. Site improvements consist of a 400-square-foot building which formerly housed electrical equipment for the substation and two underground electrical vaults which provide access to a subsurface electrical conduit traversing the site. The 2007 Preliminary Endangerment Assessment (PEA) identified petroleum hydrocarbons as gasoline, diesel, and motor oil, and lead, arsenic, and benzo(a)pyrene (BaP) as constituents of

<i>Map Key</i>	<i>Number of Records</i>	<i>Direction</i>	<i>Distance (mi/ft)</i>	<i>Elev/Diff (ft)</i>	<i>Site</i>	<i>DB</i>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

concern at the site contributing to excess cancer risk above the  $1 \times 10^{-6}$  threshold for unrestricted use. Historical investigations have determined that chemical concentrations are highest in shallow soils and attenuate rapidly with depth. As described in the PEA, site-wide excavation of soils to 1.5 feet below grade and targeted excavation to approximately 2 feet below grade would reduce the residual risk to below  $1 \times 10^{-6}$ , allowing the site to be reused and/or redeveloped with no use restrictions. The PEA and the Final RAW established the following chemical-specific cleanup goals, based on the 95 percent upper confidence limit (95 UCL) of site-wide confirmation soil data: TPHg, 625 milligrams per kilogram (mg/kg); TPHd, 840 mg/kg; TPHmo, 500 mg/kg, with a not-to-exceed concentration of 1,000 mg/kg; Lead, 150 mg/kg, with a not-to-exceed concentration of 255 mg/kg; Arsenic, 2.9 mg/kg; and, BaP, 0.038 mg/kg.

Between May 13 and June 5, 2009, Stantec oversaw the removal of 1,248 cubic yards (yd<sup>3</sup>) of soil. Approximately 238 yd<sup>3</sup> were disposed of as Class 1 non-Resource Conservation and Recovery Act (non-RCRA) waste due to elevated concentrations of soluble lead; the remaining material was disposed of as Class II waste. All excavated soil was disposed of at Chemical Waste Management's Kettleman Hills facility in Kettleman City, California. Several post-excavation confirmation soil samples reported one or more constituents at concentrations above the not-to-exceed threshold or at concentrations high enough to contribute to a 95 UCL concentration above the corresponding cleanup goal. These areas were over-excavated and the subsequent confirmation sample results compared favorably with the cleanup goals. Final confirmation soil sample results were below cleanup goals: TPHg, all reported concentrations were below the laboratory reporting limit of 0.50 mg/kg; TPHd, the calculated site-wide 95 UCL concentration was 7.4 mg/kg; TPHmo, the calculated site-wide 95 UCL concentration was 67.5 mg/kg, and the site maximum concentration was 530 mg/kg; Lead, the calculated site-wide 95 UCL concentration was 24.4 mg/kg, and the site maximum concentration was 109 mg/kg; Arsenic, the calculated site-wide 95 UCL concentration was 2.5 mg/kg; Benzo(a)pyrene (calculated as BaP equivalents), the calculated site-wide 95 UCL concentration was 0.027 mg/kg.

Based on these results, the remedial action objectives of reducing the site-wide excess cancer risk (ECR) to  $1 \times 10^{-6}$  or less, and ensuring soils left in-place contain chemicals of concern at concentrations less than cleanup goals, have been achieved and the site is suitable for unrestricted use. The Site was Certified that no further removal/remedial action is necessary on January 19, 2010.

COPPER AND COMPOUNDS  
TPH-GAS  
VANADIUM AND COMPOUNDS

#### Site History:

The 0.25-acre site was first developed as early as early as 1898 and used as an electrical substation beginning in 1937. The site was deactivated in 1983 and has been vacant since. Site improvements consist of a 400-square-foot building which formerly housed electrical equipment for the substation and two underground electrical vaults which provide access to a subsurface electrical conduit traversing the site. The 2007 Preliminary Endangerment Assessment (PEA) identified petroleum hydrocarbons as gasoline, diesel, and motor oil, and lead, arsenic, and benzo(a)pyrene (BaP) as constituents of concern at the site contributing to excess cancer risk above the 1 x 10<sup>-6</sup> threshold for unrestricted use. Historical investigations have determined that chemical concentrations are highest in shallow soils and attenuate rapidly with depth. As described in the PEA, site-wide excavation of soils to 1.5 feet below grade and targeted excavation to approximately 2 feet below grade would reduce the residual risk to below 1 x 10<sup>-6</sup>, allowing the site to be reused and/or redeveloped with no use restrictions. The PEA and the Final RAW established the following chemical-specific cleanup goals, based on the 95 percent upper confidence limit (95 UCL) of site-wide confirmation soil data: TPHg, 625 milligrams per kilogram (mg/kg); TPHd, 840 mg/kg; TPHmo, 500 mg/kg, with a not-to-exceed concentration of 1,000 mg/kg; Lead, 150 mg/kg, with a not-to-exceed concentration of 255 mg/kg; Arsenic, 2.9 mg/kg; and, BaP, 0.038 mg/kg.

Between May 13 and June 5, 2009, Stantec oversaw the removal of 1,248 cubic yards (yd<sup>3</sup>) of soil. Approximately 238 yd<sup>3</sup> were disposed of as Class 1 non-Resource Conservation and Recovery Act (non-RCRA) waste due to elevated concentrations of soluble lead; the remaining material was disposed of as Class II waste. All excavated soil was disposed of at Chemical Waste Management's Kettleman Hills facility in Kettleman City, California. Several post-excavation confirmation soil samples reported one or more constituents at concentrations above the not-to-exceed threshold or at concentrations high enough to contribute to a 95 UCL concentration above the corresponding cleanup goal. These areas were over-excavated and the subsequent confirmation sample results compared favorably with the cleanup goals. Final confirmation soil sample results were below cleanup goals: TPHg, all reported concentrations were below the laboratory reporting limit of 0.50 mg/kg; TPHd, the calculated site-wide 95 UCL concentration was 7.4 mg/kg; TPHmo, the calculated site-wide 95 UCL concentration was 67.5 mg/kg, and the site maximum concentration was 530 mg/kg; Lead, the calculated site-wide 95 UCL concentration was 24.4 mg/kg, and the site maximum concentration was 109 mg/kg; Arsenic, the calculated site-wide 95 UCL concentration was 2.5 mg/kg; Benzo(a)pyrene (calculated as BaP equivalents), the calculated site-wide 95 UCL concentration was 0.027 mg/kg.

Based on these results, the remedial action objectives of reducing the site-wide excess cancer risk (ECR) to 1 x 10<sup>-6</sup> or less, and ensuring soils left in-place contain chemicals of concern at concentrations less than cleanup goals, have been achieved and the site is suitable for unrestricted use. The Site was Certified that no further removal/remedial action is necessary on January 19, 2010.

**SIC Name:** ELECTRIC, GAS & SANITARY SERVICES  
**Filename:**  
**Comments:**

This site is adjacent to a former manufactured gas plant and is the only portion of the property acquired by PG&E in 1938 that was not originally part of the former gas plant. The PEA was conducted and found elevated levels of mercury TPH, copper, and vanadium. The report recommended removal of the localized mercury and soils with elevated TPH. The Dept. concurs with these recommendations. This site has been separated from the CalSites site known as PG&E Former Manufactured Gas Plant SQ-FR-FRS-2 (Fresno-2) #10-49-0095 as this site was never used for the gas plant and has been investigated separately. A PEA is still required for the gas plant site. Site status is bklg pending removal of mercury and TPH.

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

**Discharge Source:** Dispenser  
**File Location:**  
**Site History:**

Subsurface analysis of soil revealed the presence of petroleum constituents. Benzene, a constituent of petroleum products is currently on the list of Proposition 65 chemicals as a known carcinogen. The preliminary investigation conducted at the site showed soil contamination. Further investigation will be required. The case will be referred to the California Regional Water Quality Control Board, Central Valley Region for review, future site investigations and direct further assessment work as needed. The scope of future subsurface investigation may include the determination of potential groundwater impacts.

<b>Disadvantaged Community:</b>			
<b>Coordinate Source:</b>	Google Map Move		
<b>Discharge Cause:</b>	Corrosion, Overfill, Unknown		
<b>Discharge Source:</b>	Tank		
<b>File Location:</b>			
<b>Site History:</b>			

One underground storage tank (UST) system was removed from this location. The contents of the 550-gallon tank was gasoline. The exterior of the tank was rusted and pitted. Several pin-sized holes were observed. The depth to the base of the tank was approximately 6 feet below site grade (BSG). A total of two soil samples were obtained from beneath the UST at depths of approximately 9 feet and 14 feet BSG. One soil sample was obtained from beneath the former dispenser at a depth of approximately 5 feet BSG. Both samples below the UST indicate that gasoline constituents were present in soil at the following levels: 15 mg/kg Total Petroleum Hydrocarbons - gasoline range (TPHg) at 9 feet BSG, and 46 mg/kg TPHg at 14 feet BSG. Ethylbenzene, Toluene, Xylene, and Naphthalene were also detected. This case will be referred to the Regional Water Quality Control Board, Central Valley Region-Fresno for further investigation.

<b>Future Land Use:</b>			
<b>Cleanup Oversight Agencies:</b>	CENTRAL VALLEY RWQCB (REGION 5F) (LEAD) - CASE #: 5T10000912 CASEWORKER: MICHEALE EASLEY FRESNO COUNTY - CASE #: FA0169629		
<b>Gndwater Monitoring Freque:</b>			
<b>Designated Beneficial Use Desc:</b>	Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply, Water Contact Recreation, Non-Contact Water Recreation		
<b>Site History:</b>			

One underground storage tank (UST) system was removed from this location. The contents of the 550-gallon tank was gasoline. The exterior of the tank was rusted and pitted. Several pin-sized holes were observed. The depth to the base of the tank was approximately 6 feet below site grade (BSG).

A total of two soil samples were obtained from beneath the UST at depths of approximately 9 feet and 14 feet BSG. One soil sample was obtained from beneath the former dispenser at a depth of approximately 5 feet BSG.

Both samples below the UST indicate that gasoline constituents were present in soil at the following levels: 15 mg/kg Total Petroleum Hydrocarbons - gasoline range (TPHg) at 9 feet BSG, and 46 mg/kg TPHg at 14 feet BSG. Ethylbenzene, Toluene, Xylene, and Naphthalene were also detected.

This case will be referred to the Regional Water Quality Control Board, Central Valley Region-Fresno for further investigation.

# Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Zip	ERIS ID
----	------------------------	---------	------	-----	---------

No unplottable records were found that may be relevant for the search criteria.

# Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

# Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

## **Standard Environmental Record Sources**

### **Federal**

#### **Formerly Utilized Sites Remedial Action Program:**

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date: Mar 4, 2017**

#### **National Priority List:**

[NPL](#)

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Mar 30, 2022**

#### **National Priority List - Proposed:**

[PROPOSED NPL](#)

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Mar 30, 2022**

#### **Deleted NPL:**

[DELETED NPL](#)

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Mar 30, 2022**

**SEMS List 8R Active Site Inventory:**

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: Apr 27, 2022**

**Inventory of Open Dumps, June 1985:**

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

**SEMS List 8R Archive Sites:**

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: Apr 27, 2022**

**Comprehensive Environmental Response, Compensation and Liability Information System -**

CERCLIS

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Apr 11, 2022**

**RCRA non-CORRACTS TSD Facilities:**

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Apr 11, 2022**

**RCRA Generator List:**

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Apr 11, 2022**

**RCRA Small Quantity Generators List:**

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Apr 11, 2022**

**RCRA Very Small Quantity Generators List:**

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Apr 11, 2022**

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Apr 11, 2022**

**RCRA Sites with Controls:**

[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date: Apr 11, 2022**

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Dec 30, 2021**

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Dec 30, 2021**

**Land Use Control Information System:**

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date: Sep 1, 2006**

**Institutional Control Boundaries at NPL sites:**

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

**Government Publication Date: Mar 30, 2022**

**Emergency Response Notification System:**

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1982-1986**

**Emergency Response Notification System:**

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1987-1989**

**Emergency Response Notification System:**

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date: Dec 31, 2021**

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Aug 20, 2021**

**FEMA Underground Storage Tank Listing:**

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date: Dec 31, 2017**

**Facility Response Plan:**

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date: Dec 31, 2021**

**Delisted Facility Response Plans:**

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date: Dec 31, 2021**

**Historical Gas Stations:**

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date: Jul 1, 1930**

**Petroleum Refineries:**

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date: Feb 4, 2022**

**Petroleum Product and Crude Oil Rail Terminals:**

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date: Feb 4, 2022**

**LIEN on Property:**

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date: Apr 27, 2022**

**Superfund Decision Documents:**

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date: May 3, 2022**

**State**

**State Response Sites:**

[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

**Government Publication Date: May 30, 2022**

**EnviroStor Database:**

[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

**Government Publication Date: May 30, 2022**

**Delisted State Response Sites:**

[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

**Government Publication Date: May 30, 2022**

**Solid Waste Information System (SWIS):**

[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

**Government Publication Date: Feb 2, 2022**

**Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:**

[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

**Government Publication Date: Sep 20, 2006**

**Waste Management Unit Database:**

WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

**Government Publication Date:** Jan 1, 2000

**EnviroStor Hazardous Waste Facilities:**

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

**Government Publication Date:** May 30, 2022

**Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:**

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

**Government Publication Date:** Dec 31, 1995

**Construction and Demolition Debris Recyclers:**

C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

**Government Publication Date:** Jun 20, 2018

**Recycling Centers:**

RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**Listing of Certified Processors:**

PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**Listing of Certified Dropoff, Collection, and Community Service Programs:**

CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**Land Disposal Sites:**

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

**Government Publication Date:** Feb 15, 2022

**Leaking Underground Fuel Tank Reports:**

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

**Government Publication Date:** Feb 15, 2022

**Delisted Leaking Storage Tanks:**

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

**Permitted Underground Storage Tank (UST) in GeoTracker:**

[UST](#)

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Apr 25, 2022

**Proposed Closure of Underground Storage Tank Cases:**

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

**Historical Hazardous Substance Storage Information Database:**

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

**Statewide Environmental Evaluation and Planning System:**

[UST SWEEPS](#)

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

**Aboveground Storage Tanks:**

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

**SWRCB Historical Aboveground Storage Tanks:**

[AST SWRCB](#)

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

**Oil and Gas Facility Tanks:**

[TANK OIL GAS](#)

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 4, 2022

**Delisted Storage Tanks:**

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: May 25, 2022

**California Environmental Reporting System (CERS) Tanks:**

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 5, 2022

**Delisted California Environmental Reporting System (CERS) Tanks:**

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Apr 5, 2022

**Historical Hazardous Substance Storage Container Information - Facility Summary:**

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

**Government Publication Date: May 27, 1988**

**Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:**

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

**Government Publication Date: May 30, 2022**

**CALSITES Database:**

[CALSITES](#)

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

**Government Publication Date: May 1, 2004**

**Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:**

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

**Government Publication Date: Feb 18, 2021**

**Deed Restrictions and Land Use Restrictions:**

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

**Government Publication Date: Feb 15, 2022**

**Voluntary Cleanup Program:**

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

**Government Publication Date: May 30, 2022**

**GeoTracker Cleanup Program Sites:**

[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

**Government Publication Date: Feb 15, 2022**

**Delisted Cleanup Program Sites:**

[DELISTED CLEANUP](#)

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

**Government Publication Date: Feb 15, 2022**

**Delisted County Records:**

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date: May 26, 2022**

## **Tribal**

**Leaking Underground Storage Tanks (LUSTs) on Indian Lands:**  
LUSTs on Tribal/Indian Lands in Region 9, which includes California.  
*Government Publication Date: Oct 12, 2021*

INDIAN LUST

**Underground Storage Tanks (USTs) on Indian Lands:**  
USTs on Tribal/Indian Lands in Region 9, which includes California.  
*Government Publication Date: Oct 12, 2021*

INDIAN UST

**Delisted Tribal Leaking Storage Tanks:**  
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.  
*Government Publication Date: Jan 31, 2022*

DELISTED ILST

**Delisted Tribal Underground Storage Tanks:**  
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.  
*Government Publication Date: Oct 13, 2021*

DELISTED IUST

## **County**

### **Fresno County - CUPA/Solid Waste Programs Resource List:**

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Fresno County. This list is made available by Fresno County Department of Environmental Health Division which is approved by Cal-EPA as CUPA for the County.  
*Government Publication Date: Jun 28, 2021*

CUPA FRESNO

## **Additional Environmental Record Sources**

### **Federal**

#### **Facility Registry Service/Facility Index:**

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).  
*Government Publication Date: Nov 2, 2020*

FINDS/FRS

#### **Toxics Release Inventory (TRI) Program:**

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.  
*Government Publication Date: Aug 24, 2021*

TRIS

#### **Perfluorinated Alkyl Substances (PFAS) Releases:**

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.  
*Government Publication Date: Aug 24, 2021*

PFAS TRI

#### **PFOA/PFOS Contaminated Sites:**

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).  
*Government Publication Date: Apr 15, 2022*

PFAS NPL

**Perfluorinated Alkyl Substances (PFAS) Water Quality:**

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date:** Jul 20, 2020

**SSEHRI PFAS Contamination Sites:**

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

**Government Publication Date:** Dec 12, 2019

**National Response Center PFAS Spills:**

[ERNS PFAS](#)

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

**Government Publication Date:** Feb 23, 2022

**Hazardous Materials Information Reporting System:**

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

**Government Publication Date:** Sep 1, 2020

**National Clandestine Drug Labs:**

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

**Government Publication Date:** Nov 22, 2021

**Toxic Substances Control Act:**

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

**Government Publication Date:** Apr 11, 2019

**Hist TSCA:**

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

**Government Publication Date:** Dec 31, 2006

**FTTS Administrative Case Listing:**

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**FTTS Inspection Case Listing:**

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

**Potentially Responsible Parties List:**

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Mar 30, 2022

**State Coalition for Remediation of Drycleaners Listing:**

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRCD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

**Integrated Compliance Information System (ICIS):**

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Apr 30, 2022

**Drycleaner Facilities:**

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

**Delisted Drycleaner Facilities:**

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

**Formerly Used Defense Sites:**

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

**Former Military Nike Missile Sites:**

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

**PHMSA Pipeline Safety Flagged Incidents:**

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

**Material Licensing Tracking System (MLTS):**

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: May 11, 2021**

**Historic Material Licensing Tracking System (MLTS) sites:**

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

**Mines Master Index File:**

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Government Publication Date: Feb 1, 2022**

**Surface Mining Control and Reclamation Act Sites:**

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

**Government Publication Date: Dec 18, 2020**

**Mineral Resource Data System:**

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

**Government Publication Date: Mar 15, 2016**

**Uranium Mill Tailings Radiation Control Act Sites:**

[URANIUM](#)

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

**Government Publication Date: Mar 4, 2017**

**Alternative Fueling Stations:**

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

**Government Publication Date: May 16, 2022**

**Air Facility System:**

[AFS](#)

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

**Government Publication Date: Oct 17, 2014**

**Superfunds Consent Decrees:**

[CONSENT DECREES](#)

A list of Superfund consent decrees made available by the Department of Justice, Environment & Natural Resources Division (ENRD).

**Government Publication Date: May 18, 2022**

**Registered Pesticide Establishments:**

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

**Government Publication Date: Mar 30, 2022**

**Polychlorinated Biphenyl (PCB) Transformers:**

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

**Government Publication Date: Oct 15, 2019**

**Polychlorinated Biphenyl (PCB) Notifiers:**

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date: Jan 20, 2022**

**State**

**Dry Cleaning Facilities:**

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

**Government Publication Date: Dec 20, 2021**

**Delisted Drycleaners:**

DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

**Government Publication Date: Feb 28, 2020**

**Non-Toxic Dry Cleaning Incentive Program:**

DRYCLEANING GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

**Government Publication Date: Feb 28, 2020**

**Per- and Polyfluoroalkyl Substances (PFAS):**

PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

**Government Publication Date: Feb 15, 2022**

**PFOA/PFOS Groundwater:**

PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

**Government Publication Date: Apr 27, 2022**

**Hazardous Waste and Substances Site List - Site Cleanup:**

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

**Government Publication Date: May 20, 2021**

**Toxic Pit Cleanup Act Sites:**

TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is no longer maintained, and updates are not planned.

**Government Publication Date: Jul 1, 1995**

**List of Hazardous Waste Facilities Subject to Corrective Action:**

[DTSC HWF](#)

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

**Government Publication Date: Jul 18, 2016**

**EnviroStor Inspection, Compliance, and Enforcement:**

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

**Government Publication Date: Apr 29, 2021**

**School Property Evaluation Program Sites:**

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

**Government Publication Date: May 30, 2022**

**California Hazardous Material Incident Report System (CHMIRS):**

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Feb 8, 2022**

**Historical California Hazardous Material Incident Report System (CHMIRS):**

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Jan 1, 1993**

**Hazardous Waste Manifest Data:**

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Oct 24, 2016**

**Historical Hazardous Waste Manifest Data:**

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Dec 31, 1992**

**DTSC Registered Hazardous Waste Transporters:**

[HW TRANSPORT](#)

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

**Government Publication Date: Oct 19, 2020**

**Registered Waste Tire Haulers:**

[WASTE TIRE](#)

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date: Apr 12, 2022**

**California Medical Waste Management Program Facility List:**

[MEDICAL WASTE](#)

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

**Government Publication Date: Dec 31, 2020**

**Historical Cortese List:**

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

**Government Publication Date: Nov 13, 2008**

**Cease and Desist Orders and Cleanup and Abatement Orders:**

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

**Government Publication Date: Dec 6, 2021**

**California Environmental Reporting System (CERS) Hazardous Waste Sites:**

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Government Publication Date: Apr 5, 2022**

**Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:**

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

**Government Publication Date: Nov 29, 2018**

**Sites in GeoTracker:**

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

**Government Publication Date: Feb 15, 2022**

**Mines Listing:**

[MINE](#)

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

**Government Publication Date: Dec 17, 2021**

**Recorded Environmental Cleanup Liens:**

[LIEN](#)

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

**Government Publication Date: May 4, 2022**

**Waste Discharge Requirements:**

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

**Government Publication Date: Feb 15, 2022**

**Toxic Pollutant Emissions Facilities:**

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

**Government Publication Date: Dec 31, 2019**

**Clandestine Drug Lab Sites:**

CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

**Government Publication Date: Jan 19, 2021**

**Tribal**

***No Tribal additional environmental record sources available for this State.***

**County**

***No County additional environmental databases were selected to be included in the search.***

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

# Appendix D2 PHYSICAL SETTING REPORT

## Property Information

Order Number:	22061401176p
Date Completed:	June 15, 2022
Project Number:	822AR0107X.0001
Project Property:	Stantec BF H St Fresno, CA 735 H Street Fresno CA 93721
Coordinates:	
Latitude:	36.72981231
Longitude:	-119.78960873
UTM Northing:	4068528.65526 Meters
UTM Easting:	250887.855772 Meters
UTM Zone:	UTM Zone 11S
Elevation:	292.35 ft
Slope Direction:	NNW

Topographic Information.....	2
Hydrologic Information.....	4
Geologic Information.....	7
Soil Information.....	9
Wells and Additional Sources.....	13
Summary.....	14
Detail Report.....	19
Radon Information.....	123
Appendix.....	124
Liability Notice.....	126

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

# Topographic Information

**Current USGS Topo (2015)**

**Quadrangle(s): Fresno South, CA**

Source: USGS 7.5 Minute Topographic Map

# Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation: 292.35 ft  
Slope Direction: NNW

# Hydrologic Information

Source: Esri, Maxar, Earthstar Geographics, and the GIS User Community

## Wetland

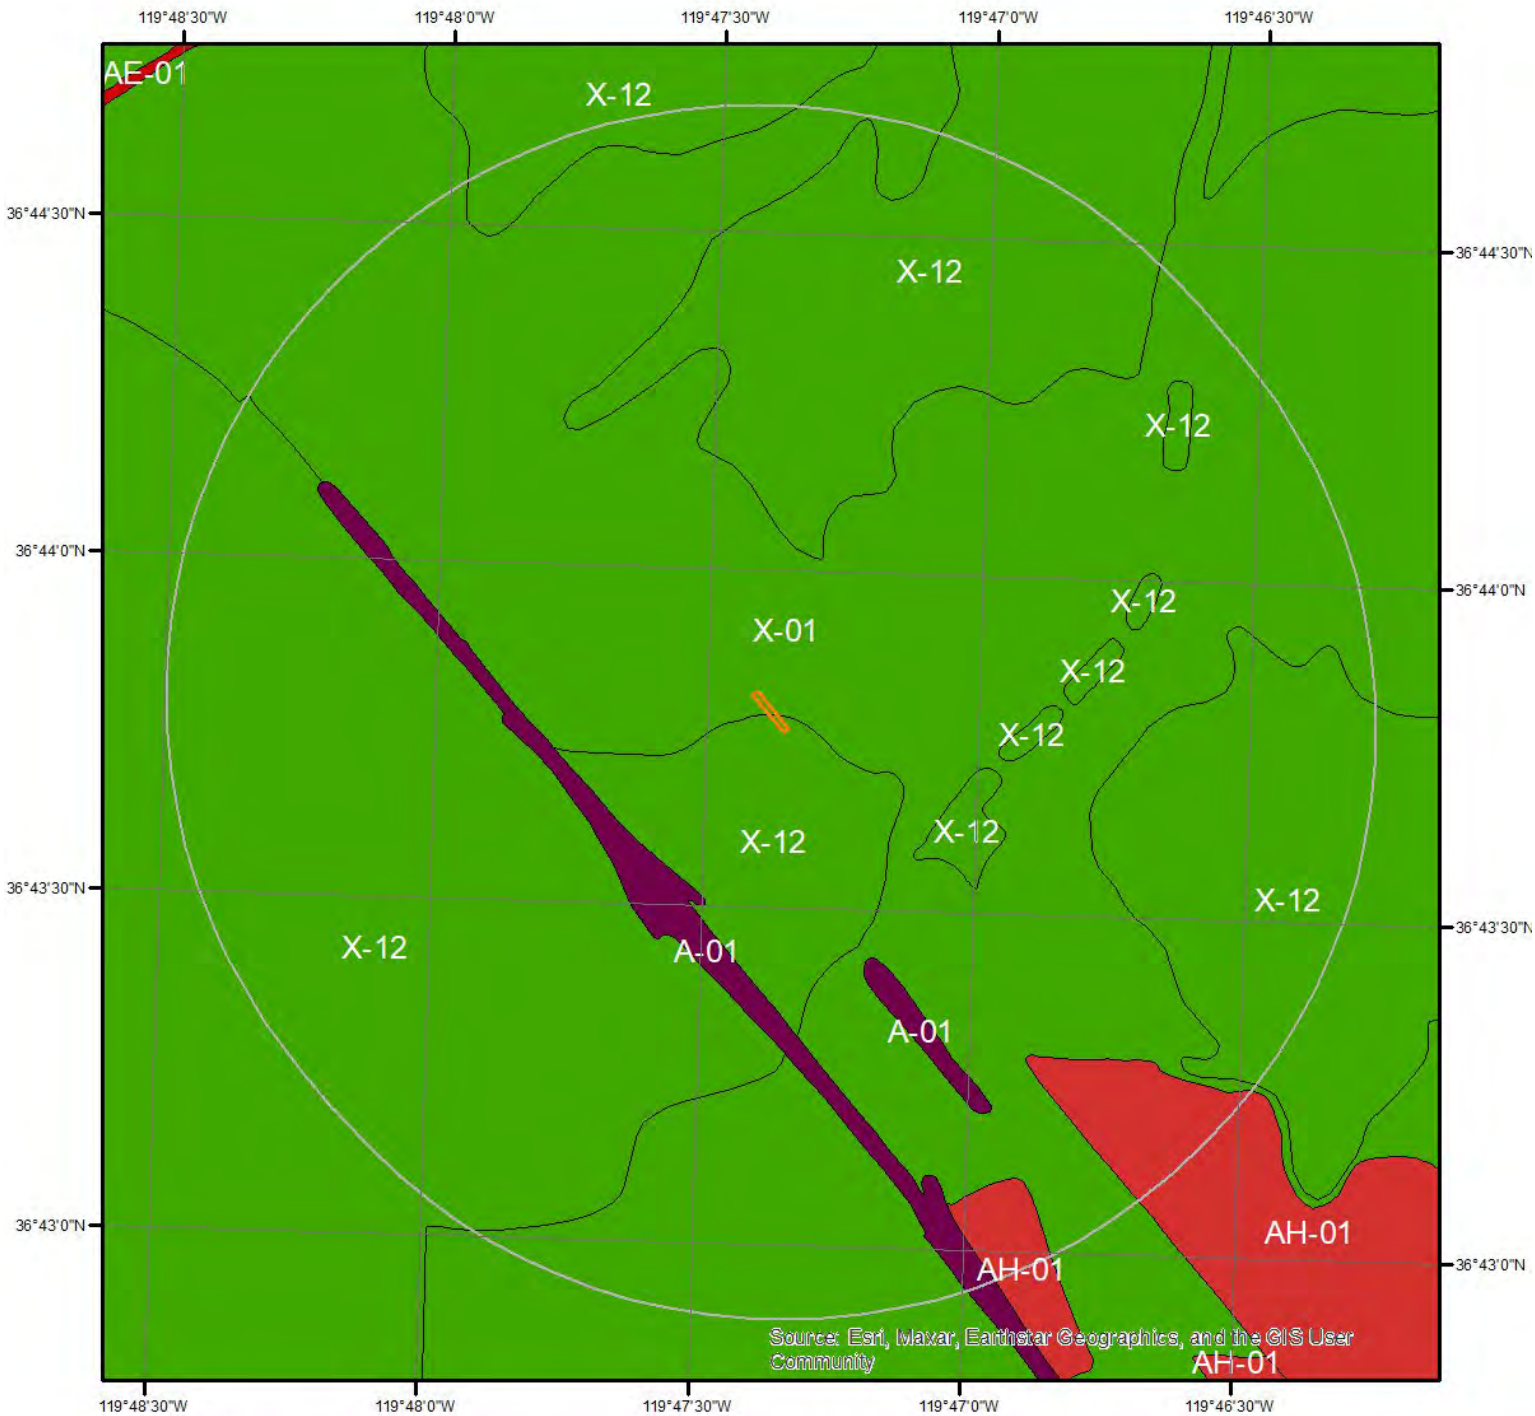

This map shows wetland existence using data from US Fish & Wildlife. Data coverage is shown to the right. Gray indicates no data available in the area.

- |   |   |
|---|---|
|  Estuarine and Marine Deepwater    |  Freshwater Pond |
|  Estuarine and Marine Wetland      |  Lake            |
|  Freshwater Emergent Wetland       |  Other           |
|  Freshwater Forested/Shrub Wetland |  Riverine        |

# Hydrologic Information

## Flood Hazard Zones

This map shows FEMA flood hazard zones. FIRM panels are shown to the right, and blank indicates no data is available.

Quadrangle(s): Fresno South, CA

## Hydrologic Information

The Wetland Type map shows wetland existence overlaid on an aerial imagery. The Flood Hazard Zones map shows FEMA flood hazard zones overlaid on an aerial imagery. Relevant FIRM panels and detailed zone information is provided below. For detailed Zone descriptions please click the link: <https://floodadvocate.com/fema-zone-definitions>

---

Available FIRM Panels in area: 06019C2110H(effective:2009-02-18)

---

### Flood Zone A-01

Zone: A  
Zone subtype:

---

### Flood Zone AH-01

Zone: AH  
Zone subtype:

---

### Flood Zone X-01

Zone: X  
Zone subtype: 0.2 PCT ANNUAL CHANCE FLOOD HAZARD

---

### Flood Zone X-12

Zone: X  
Zone subtype: AREA OF MINIMAL FLOOD HAZARD

# Geologic Information

## Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

## Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

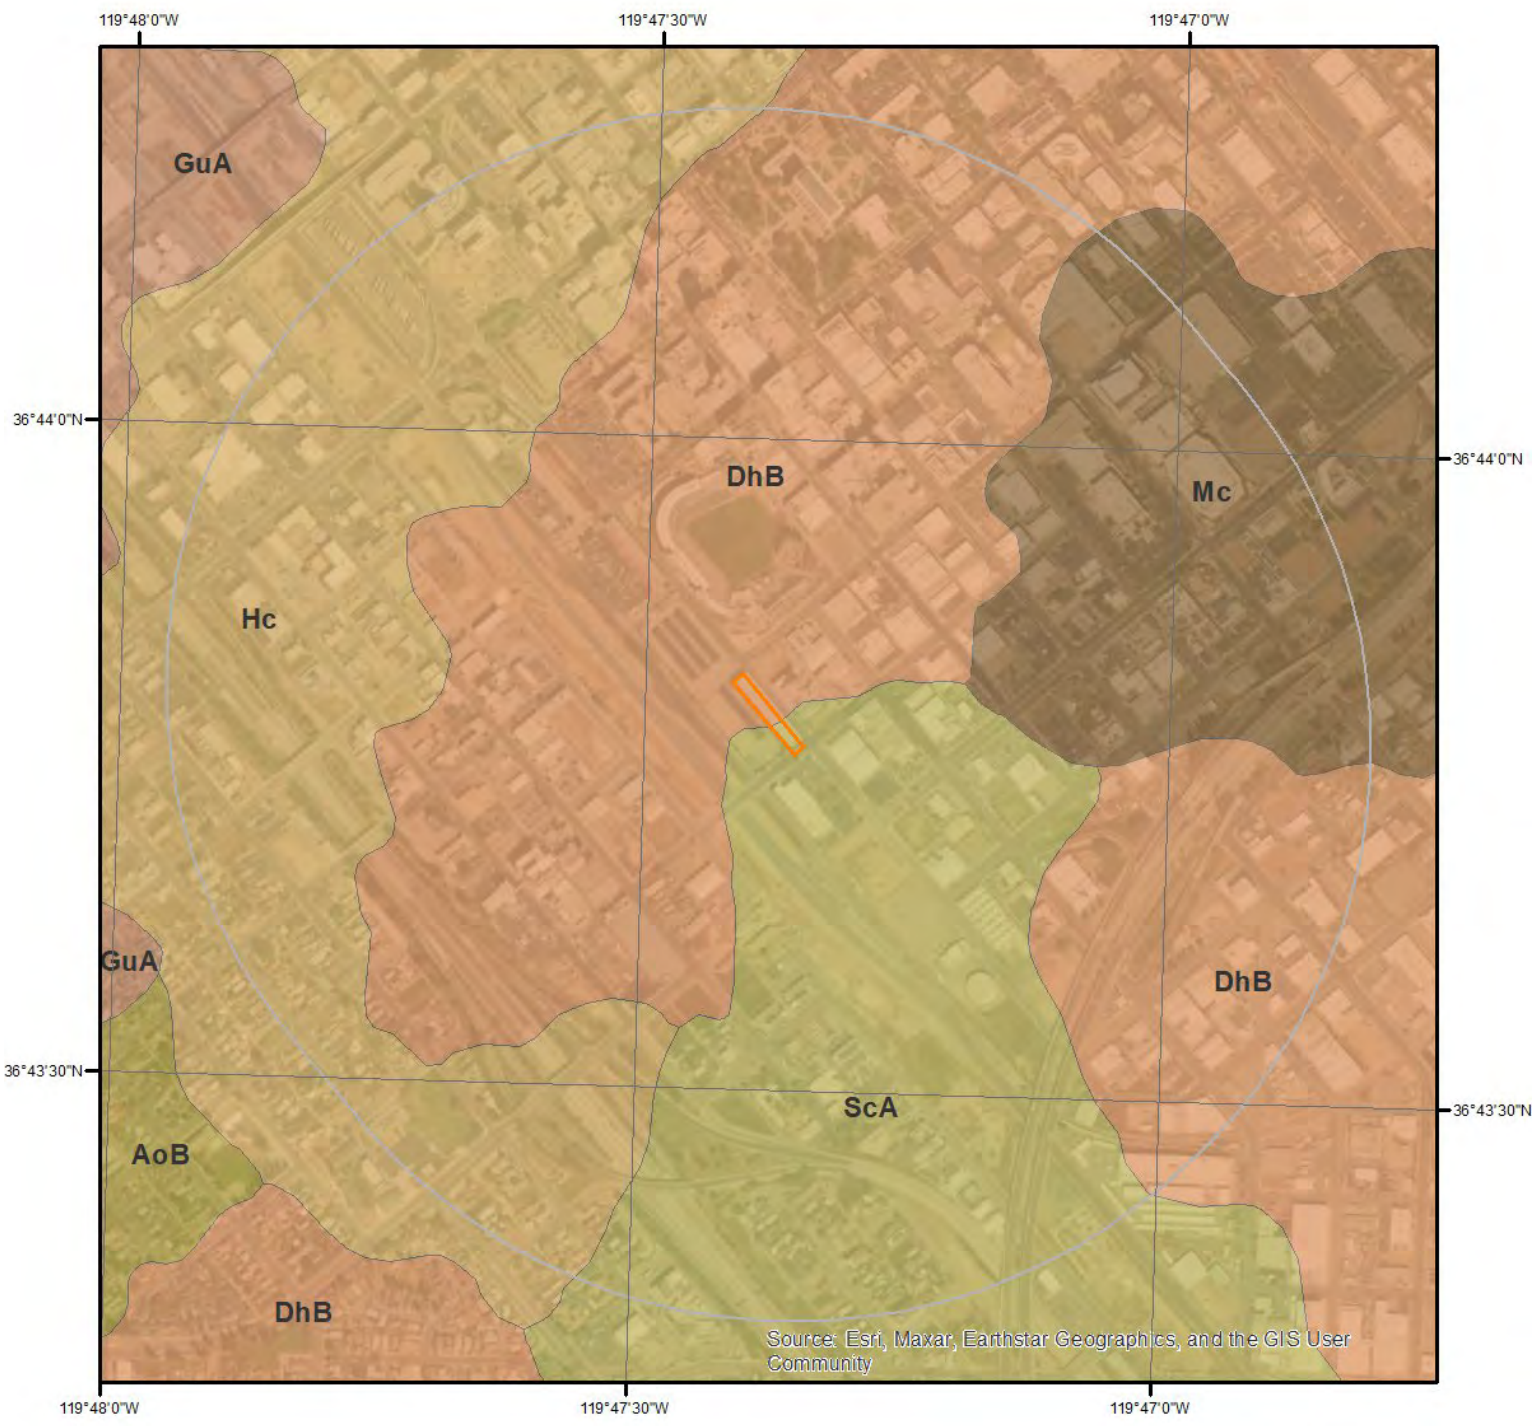

---

### Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

# Soil Information

## SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

## Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

---

### Map Unit DhB (29.28%)

Map Unit Name: Delhi loamy sand, 3 to 9 percent slopes  
Bedrock Depth - Min:  
Watertable Depth - Annual Min:  
Drainage Class - Dominant: Somewhat excessively drained  
Hydrologic Group - Dominant: A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Delhi(85%)	
horizon A(0cm to 18cm)	Loamy sand
horizon C1(18cm to 64cm)	Loamy sand
horizon C2(64cm to 152cm)	Loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: DhB - Delhi loamy sand, 3 to 9 percent slopes

Component: Delhi (85%)

The Delhi component makes up 85 percent of the map unit. Slopes are 3 to 9 percent. This component is on dunes on fan remnants on valleys. The parent material consists of eolian deposits derived from alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 3s. This soil does not meet hydric criteria.

Component: Fresno (12%)

Generated brief soil descriptions are created for major soil components. The Fresno soil is a minor component.

Component: Unnamed (3%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

---

### Map Unit Hc (54.85%)

Map Unit Name: Hanford sandy loam  
Bedrock Depth - Min:  
Watertable Depth - Annual Min:  
Drainage Class - Dominant: Well drained  
Hydrologic Group - Dominant: A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Hanford(85%)	
horizon Ap(0cm to 41cm)	Sandy loam
horizon C(41cm to 183cm)	Sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Hc - Hanford sandy loam

## Soil Information

### Component: Hanford (85%)

The Hanford component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans on valleys. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4s. Irrigated land capability classification is 2s. This soil does not meet hydric criteria.

### Component: Unnamed (10%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

### Component: Unnamed (5%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

---

### Map Unit Mc (10.59%)

Map Unit Name:	Madera loam
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

#### Madera(85%)

horizon Ap(0cm to 51cm)	Loam
horizon Bt(51cm to 84cm)	Clay
horizon Bkqm(84cm to 109cm)	Cemented

### Component Description:

Minor map unit components are excluded from this report.

Map Unit: Mc - Madera loam

### Component: Madera (85%)

The Madera component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on erosion remnants on terraces on valleys. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer, duripan, is 20 to 40 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R017XE113CA Terrace 12-14" ecological site. Nonirrigated land capability classification is 4s. Irrigated land capability classification is 3s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

### Component: Unnamed (14%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

### Component: Unnamed (1%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

---

### Map Unit ScA (5.29%)

Map Unit Name:	San Joaquin sandy loam, 0 to 3 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

## Soil Information

### San Joaquin(85%)

horizon A(0cm to 41cm)	Sandy loam
horizon Bt1(41cm to 71cm)	Sandy clay loam
horizon 2Bt2(71cm to 74cm)	Clay
horizon 2Bqm(74cm to 91cm)	Cemented
horizon 2C(91cm to 152cm)	Coarse sandy loam

### Component Description:

Minor map unit components are excluded from this report.

Map Unit: ScA - San Joaquin sandy loam, 0 to 3 percent slopes, MLRA 17

### Component: San Joaquin (90%)

The San Joaquin component makes up 90 percent of the map unit. Slopes are 0 to 3 percent. This component is on fan remnants on valleys. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer, duripan, is 19 to 25 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is very low. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 9 inches during January, February. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4s. Irrigated land capability classification is 4s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 3 within 30 inches of the soil surface.

### Component: Snelling (5%)

Generated brief soil descriptions are created for major soil components. The Snelling soil is a minor component.

### Component: Alamo (4%)

Generated brief soil descriptions are created for major soil components. The Alamo soil is a minor component.

### Component: Unnamed (1%)

Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

## Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *FRESNO* County: **2**

*Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L*

*Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L*

*Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L*

---

### Federal Area Radon Information for *FRESNO* County

No Measures/Homes:	106
Geometric Mean:	0.8
Arithmetic Mean:	1.3
Median:	0.9
Standard Deviation:	1.3
Maximum:	9.4
% >4 pCi/L:	2
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

## **Federal Sources**

### **FEMA National Flood Hazard Layer**

**FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

### **Indoor Radon Data**

**INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

### **Public Water Systems Violations and Enforcement Data**

**PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

### **Radon Zone Level**

**RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

### **Safe Drinking Water Information System (SDWIS)**

**SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

### **Soil Survey Geographic database**

**SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

### **U.S. Fish & Wildlife Service Wetland Data**

**US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

### **USGS Current Topo**

**US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

### **USGS Geology**

**US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

### **USGS National Water Information System**

**FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

## **State Sources**

### **Oil and Gas Wells**

**OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

# Appendix

Oil, Gas and Geothermal Resources.

## **Periodic Groundwater Level Measurement Locations**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

**MONITOR WELLS**

## **Well Completion Reports**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

**WATER WELLS**

## Liability Notice

**Reliance on information in Report:** The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Phase I Environmental Site Assessment

RE: CITY DIRECTORY RESEARCH  
735 H Street  
Fresno,CA 93721

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

**Search Criteria:**

BEG-1000 of H St  
1500-2000 of Mono St

**Search Notes:**

Appendix E5 HISTORICAL RECORDS – NEWSPAPER ARTICLES  
(from <https://www.newspapers.com>)

Date	6/28/1893
Search Term	750 H Street
Location	Neighboring property to north
Comments	At the time of this article, the addresses of 722-760 H Street were associated with the block lying northwest of Inyo Street and northeast of H Street (catty corner from the Subject Property). However, the business on this neighboring property by 1906 was also occupying the Subject Property with a lumber yard.

## NEW MACHINE SHOPS

VALLEY COMPANY WELL EQUIPPED  
IN NEW BUILDING.

Ben Hunt Has Machine Shop, Foundry  
and Boiler-Making Establishment  
in Perfect Order.

The Valley Foundry and Machine Works are now comfortably situated in the company's new quarters at 719-722 H street. Ben Hunt, president of the board of directors, general manager and principal stockholder, points with pride to the new establishment across the country it with the same shop, 2000 feet, on I street where he first started into business with one lathe and a drill press. That was five years ago. Little by little he has added to the works till two weeks ago the new building, 70 x 100 feet, a two-story brick, was moved into. The new building is filled up with machines necessary for any kind of machine and foundry work, with 25 and traveling cranes for heavy work. The upstairs is used for light work and pattern shop and storage.

The entire building is equipped with up-to-date machinery, the large 62-inch boring mill costing \$2500 set up. And all the toolboxes are handled by competent machinists, many of whom have been with Mr. Hunt ever since he started into business. He now employs two foundrymen, two boiler-makers, ten machinists, a draftsman and pattern makers.

The foundry is a separate building 20x40 feet, in back of the machine shops and under supervision of expert men. Two large furnaces could do casting of any size up to 300 tons in he made. This shop is also equipped with traveling cranes for heavy work.

All the new machinery was purchased and set up under the management of Mr. Hunt, who will have full control of the shops. The board of directors is composed of the following men: Ben Hunt, president; William Davidson, Wingham Abbott, J. L. Roeder, Walter Hunt.

Among the new machines just installed is a key-sealing machine for key setting pelleys and other segments. This is the only machine of its kind in the valley. Another machine that

Comments	This article documents the initial use of this neighboring property as a foundry.

# FLAMES WIPE OUT ONE WHOLE MANUFACTURING BLOCK

## STARTED IN MADARY'S

AND BURST FORTH LIKE AN EXPLOSION.

THE LOSSES ARE UNUSUALLY HEAVY, AS THE INSURANCE OWING TO HIGH RATE WAS SMALL.

Madary's Warehouse when the flames were at their height.

## FIREMEN WORK HARD

PREVENT FIRE SPREADING TO ADJACENT BLOCKS.

HEROIC WORK IS DONE BY THE VOLUNTEERS—WIND PAYS THE FIRE FIGHTERS

\$10,000. Their rate, too, has been very high, about 8 per cent, and the total amount of insurance carried was but small.

Hilfenbach & Bush put their loss at \$2000, without a cent of insurance. This mill was an annex to their old one and had been installed with new machinery, some of it having been but recently put in. The rate of insurance was so high that they did not take out any on this property.

H. H. Williams lost about \$6000 worth of furniture in the corridors on the corner of B and Lynn streets. The building belonged to the German Savings and Loan Society, and was valued at \$1000. Mr. J. F. Johnson, who lives in a way block, at Fresno, was arrested and tried for manslaughter on attempting to burn it, was a woman building, with serious flame. It was in Turkey's new mill, but the property is owned by W. H. Hilfenbach.

The oil machines were belonging to Flenck's firm. It was worth about seven. The wooden building owned by Address Bros' since the property of the firm of Central California and Mrs. Helen Johnson, who owned it, would have probably been a part of the oil machinery as well as the Union Lodge house, the hotel line at Fresno building being estimated at \$1000. Mrs. G. E. Strong, who occupied the building, had her loss at \$1000. She had moved into the house in December and had her furniture well established there. She carried \$1000 insurance with Flenck's firm.

All other damage done was poorly estimated.

### NOTES AND INCIDENTS.

There were very few being a fire last the hour. Working hours while the big one was in progress. A flying match fell on the roof of Mrs. N. N. Johnson on B street and started to burn there. A stevedore was sent to the roof and quickly put the fire out with the assistance of a bucketful of water from the house across the street. A man looking up to Mr. Kessler in the moon light, perhaps was caught fire but little damage was done.

Whether the packing houses was called off during the time of the fire and the men were all sent to the roofs with buckets and hose of water. The railroad connection within several blocks of the fire ground is an unusual source. While the fire was in its height, communication was broken at the corner by Adcox Street, Look Station and Will in Fresno, who gave some thirty gallons of kerosene and arrived in Fresno among the fire fighters. Later they carried around coffee and sandwiches, which proved more than acceptable. Chief Work on behalf of himself and the department, decided to return by Fresno Fresno on Fresno Fresno for their families.

The same three professions, with the assistance of other local people, have already undertaken the getting up of a fund to raise a fund for the fire men. The roll now shows over \$1000 and has already an ability, was frequently being kept from work for several days. They get but \$20 a month, and it is deemed to more than make up this there should be some sort of fund to remunerate them for their services. For an entertainment will be given on Wednesday night of next week at Recreation park for the purpose of raising this fund. Tickets will be sold around town and a liberal patronage is expected. Fresno Engine House No. 2 was accepted for a time late a hospital. The injured fireman were all treated there, and at one time Chief Ward, Assistant Chief, Cook, Frank, Coon,

View of Madary's Mill and other buildings. Engine No. 1 is in the foreground.

The burning building as seen from the Southern Pacific reservation.

**ESTIMATED LOSSES**

M. E. Madary	\$125,000.00
Address Bros	55,000.00
Hilfenbach & Bush	2,000.00
H. H. Williams	6,000.00
German Savings Society	1,000.00
Thomas Dahl	3,000.00
Bank of Central California	2,000.00
Mrs. M. Johnson	2,000.00
Mrs. G. E. Strong	2,000.00
<b>Total</b>	<b>\$200,000.00</b>

The most disastrous fire experienced in recent years in Fresno, except the glowing gold plant and the city hall, occurred on Tuesday...

happened yesterday. The wind had blown from the north recently, but nothing was thought of it as such as a fire had been frequent. Engineer L. D. Johnson called to Herman Smith, who was working near, for assistance, and Smith and Jones a fire hose, kept ready for use for just such an emergency and played a stream along the fire. The fire seemed to be out, and Smith turned away to get the hose up, when down it came. The fire broke out in a new place, and the firemen were forced to retreat.

Other engines arrived quickly and six streams were played into the house within a few minutes. Chief Ward had his hose and placed and worked the assistance of the volunteers from the crowd with shovels. If the volunteers it can be said they worked as competently and as faithfully as the paid men of the department. They worked into the hottest places without limitation of time, and they stuck to their posts as long as they could.

by heat and two or three were injured. Probably the most seriously hurt was Herman Wallace, who was on the line of engine No. 1. He carried no other in the rear of Madary's mill that he rather than look for, and he was severely burned on the left arm and shoulder and the right hand. He was taken to the room at the hotel was done and put to bed. Chief Work called to check his injuries. The doctor says it will be perhaps a week before Wallace is able to be at work.

Charles Smith, formerly a mill man, volunteered his services and fought valiantly until overcome by the heat, when he fell at his post. He, too, was almost smothered, but not seriously. Among those who assisted to the

Comments	This article is one of several references major fire occurring on neighboring properties occupied by lumber related businesses.

## PUTTING IN PIPE TO DRAIN SUMP

No More Will the Kern and H Vicinity  
Be Flooded By Winter  
Rains

With the 18-inch pipe drain from Kern and H to Inyo and H, to be laid under the sidewalk which is now paved, City Engineer Jensen expects to solve the trouble that occurs every winter when, with the heavy rains the Kern and H corners are flooded to drown out the Kohler laundry and Hollenbeck & Bush mills at two of the corners and the basement of **Ma-dary's** mills half way down H street. The Kern and H corner is a natural slump, where the flood water gathers in such quantity that there is no means to carry it off faster than it collects. The Inyo and H corner is seven-tenths of a foot higher and manholes will be placed at both corners to take in the flood water, and at Inyo and H connecting with the two-foot drain under the railroad reservation carrying off the water to be lost beyond the city limits.

Date	11/18/1909
Search Term	Madary
Location	H Street in front of Subject Property
Comments	This article documents flooding issues occurring adjacent to the Subject Property. The lack of reference to the Subject Property building suggests it was not yet constructed as of this date.

# Thomas' Parisian Dyeing ... and Cleaning Works ...

756 H STREET.

MAIN 210.

Cleaning and dyeing in all its branches. Ladies' dainty garments and feathers specialty. Also monthly contracts for gentlemen's work. Four suits a month cleaned and pressed for \$1.50 a month.

Search Term	756 H Street
Location	Neighboring property to northeast – on opposite side of H Street
Comments	This ad documents one of the laundry businesses that occupied a neighboring parcel to the northeast (754-764 H Street) from approximately 1903-1964.

# NEW RATES BRING WHOLESALE HERE

Distributive Point Is to Be  
Established by **Mark  
Lally Company**

As a result of the new distributive rates enjoyed by Fresno, a wholesale plumbing and hardware house is remodeling a building to establish an office and warehouses here as a valley distributing center. The new firm is the **Mark-Lally** company, which has leased the warehouse on H street formerly occupied by the H. Graff company and is remodeling it.

A representative of the hardware company has been here for the last two weeks and secured a lease of the H street property for a period of years. The firm engages in general hardware business and plumbing supplies.

Date	5/29/1912
Search Term	Mark Lally
Location	Subject Property Building – Area B (735 H Street)
Comments	This article provided the earliest reference to occupants of Area B within the building on the Subject Property, and suggest they were taking space occupied by a previous firm (H. Graff Co.) which other records document was a grocer.

## NEW WAREHOUSE TO BE STARTED

Swartz, Hotchkiss and Swartz will start work next week on the construction of a two-story brick warehouse at Mono and H streets for the Valley Lumber Company. The structure will occupy a lot 25 by 150 feet and will cost in the neighborhood of \$4000.

Date	3/21/1914
Search Term	Valley Lumber
Location	Neighboring property to southeast
Comments	This article is believed to reference a warehouse constructed on the neighboring property to the southeast (on the opposite side of Mono Street from the Subject Property, and on the southwest side of H Street).

## ISSUE PERMITS FOR APARTMENTS

Permits for the building of two large apartment houses were issued yesterday by James Anton, city building inspector. The George A. Schorling apartments will be located on I street between Tuolumne and Stanislaus. The cost of the building is placed at \$40,000. John Coffman will build four flats on O street between Mariposa and Tulare at a cost of \$12,000. R. Pederson & Company are contractors. Other permits were:

George Schorling, lots 1-3, block A, Terry Tract, \$200 alterations to dwelling.

Mark Lally Company, 735 H street, \$125 alterations to warehouse.

# REWARD!

## An Armour Dealer Service Man Is At Large In Your Territory

This man, when last seen, was headed your way, driving a yellow Armour car loaded with a fine assortment of window displays. He is a wizard with crepe paper and hunting.

### DESCRIPTION

1. Young, active, aggressive and enthusiastic.
2. When last seen, was wearing a nationally advertised hat, cloth suit, leather shoes, shirt, tie and other well known articles of men's attire.
3. Doesn't wear "spats" nor carry a cane.
4. Talks Advertising and Quality Armour's Products constantly.
5. Knows all about constructing window displays and decorating store interiors.
6. Has 4,000 new ideas for marketing Armour Products.

*If this man passes your store, "STOP HIM" or Phone 1646, the Armour Branch House.*

## Armour and Company

Dealers' Service Bureau

741 H Street

Fresno, Calif.

Date	8/5/1924
Search Term	741 H
Location	Subject Property Building – Area D (741 H Street)
Comments	This article is the earliest to reference Armour and Company as an occupant of 741 H Street.

Date	11/8/1924
Search Term	755 H St
Location	Adjacent property to northwest (755 H Street)
Comments	This ad represents the earliest reference to the Los Angeles Soap Company which occupied the nearest portion of the former adjacent warehouse building from 1924-1932.

**Burglars Suspected  
But Nothing Missing**

When the rear door of the Walworth-Lally Plumbing Supplies company store at 735 H street was found open early last night, burglars were suspected. The police were called, but a check disclosed nothing disturbed, according to Detective Sergeant James W. Shaw, who investigated the case.

Date	2/1/1926
Search Term	735 H Street
Location	Subject Property Building – Area B (735 H Street)
Comments	The article provides one of the last references to the Mark Lally Company (later Walworth-Lally Plumbing Supplies) as an occupant of the Subject Property.

# TWO LAUNDRIES MERGE; WILL BUILD PLANT

## Kohler And Liberty Interests Are Joined

Merger of the Liberty and Kohler steam laundries became known here yesterday, and with it the plans of the new combination for a modern type of laundry, comparable with any similar plant on the Pacific coast. Several sites, it is understood, are under consideration, and plans for the new structure are being drawn, while machinery is being secured.

Erection of the new plant, it is understood, will result in abandonment of the present Liberty laundry, 729 N street, while the present Kohler plant, **760 H Street** will be used for certain specialized forms of work, and the new plant for the great bulk of the combined business.

Both C. E. Holsen, who has been operating the Liberty laundry, and W. O. Pickford of the Kohler establishment, declined to comment on the situation, other than Pickford's admission that he and his associates had purchased an interest in the Liberty plant. It is understood that Holsen now holds a half interest in the Liberty, and the other half interest, previously held by his parents, has been given over to the Pickford interests.

Date	3/11/1927
Search Term	760 H Street
Location	Neighboring property to northeast
Comments	References laundry businesses that existed on property to northeast from 1903-1964.

# Save Your Grape Crop

Control HOPPERS Now

—with—

## VAPO-DUST No. 2 E

The season is past when Nicotine and other special Hopper Dusts are effective in controlling Grape Leaf Hopper. The material to use now is VAPO-DUST No. 2E, an oil-pyrethrum insecticide for vapor applications. VAPO-DUST No. 2E combines the effectiveness of oil and pyrethrum with the speed and economy of dust application. This unique material, originated by our corporation, has been proven by three years' usage, to be most effective when applied against Leaf Hopper.

### VAPO-DUST ADVANTAGE

ORTHO VAPO-DUST has certain proven advantages over imitative materials and other control methods now being offered for sale.

1. **Effectiveness.** Vapo-Dust is so made that it forms a vapor cloud that completely envelopes and thoroughly penetrates the vine, contacting all insects. It is sure death to every insect contacted.

2. **Safety.** The VAPO-DUST vapor cloud, quickly evaporates and disappears after penetrating the vine. The high purity of the oil used in VAPO-DUST is further insurance of safety.

3. **Speed and Economy.** When applied with the Vapo Duster machine, which needs only one man

to operate, quick coverage of the vineyard is secured at a low cost of application. (Vapo-Dust can also be applied in the various "paint spray gun" types of applicator).

### VAPO-DUST MACHINES

Vapo Dusters can be mounted on most dusting machines. Combination Vapo Duster and regular duster machines are available at reasonable prices.

There are commercial Vapo Dusters available in every district who will apply VAPO-DUST to your vineyard at a fair price. We can supply you with a list of commercial Dusters or arrange for a commercial Duster to apply VAPO-DUST to your vines.

### CYANOGAS

Cyanogas is the only other control method recognized as being effective in controlling Adult Hoppers. For growers who wish to apply Cyanogas, we are maintaining adequate stocks for immediate delivery at our warehouses at Fresno and Porterville. To insure our ability to supply your requirements when needed, we urge you to place your order with our dealer or direct with us now for delivery at once or when needed.

### FIELD SERVICE

Call at our warehouse or phone us to send our field man to further explain the use of VAPO-DUST and CYANOGAS. He will give this service and quote prices without charge or obligation on your part.

Vapo-Dust and Cyanogas Can Be Secured From Any Ortho Dealer

**THE MAN WHO DIDN'T KNOW HIS  
GRAPE LEAF HOPPER  
MULTIPLICATION TABLES**

"Sure, there are some hoppers in my vineyard," he says. "What of it?" There's a man who doesn't stop to figure.

The 100 overwintering adults he didn't destroy a while back became 10,000 in the May brood. By July they can increase to half a million and, under favorable conditions, multiply to the staggering number of 25,000,000 by harvest time.

*And all of them hungry...* all of them sucking the chlorophyll from the leaves...specking the grapes, destroying the sugar, exposing fruit to sunburn, cutting the tonnage.

That's a tough picture...but it happens. And if it only partially comes true, it can still be disastrous to crop returns.

But there's one sure protection. When hoppers attack your vines...gas 'em with **CYANO GAS!** Its gas reaches *every* leaf...and is the control method that destroys *both* crawling nymphs and winged adults.

## Seed Company Gets New Home

The selection of Fresno as the San Joaquin Valley distribution headquarters in a Germain Seed Company expansion program was announced yesterday following leasing arrangements for a new building under construction for Kenneth N. Chantry at the southeast corner of Fulton and Monterey Streets.

Walter K. Blanchard, district manager for the Germain concern, said the new structure will afford about four times the space currently used by the company in Fresno and all new equipment and fixtures will be installed, in addition to an enlarged stock of flower, vegetable and field seed, accessory lines, nursery supplies and fertilizer.

He also said machinery will be installed for cleaning processes, formerly mainly done in the Los Angeles plant. The building will have a 50x40 foot department for wholesale display and sales facilities, and an additional 80x50 feet, with spur track adjoining, for warehousing. Supplies for pets also will be stocked.

The Germain company, Blanchard said, was established in 1871 and has district branch headquarters in various sections of the state. Blanchard has been with the company since 1912 and has represented it in the Fresno district since 1929.

Leasing negotiations for the one-story brick building, which will be completed in the latter part of August, were handled through the C. W. Pearson Company, realty brokers.

## Chemical Firm Buys Syrup Plant

The **California Chemical** Spray Corporation of Richmond today purchased the former main syrup plant of the San-Mateo Basin Growers Association from Meyer Winsteinman of Portland, Ore., for approximately \$125,000.

The building, located at Hampton Avenue and South Third Street, will be used by the chemical company as a warehouse and manufacturing plant for the firm's San Joaquin Valley operations. The company has had a small distributing center at 739 H Street for about 13 years.

"We are intending to expand the operations of the company throughout the valley and need the additional warehouse and manufacturing space for that expansion," said H. C. Davies, president and general manager of the firm.

"We will install a dust mill and other equipment, and expect to get into the new plant for storage purposes by early in September."

Davies said approximately \$25,000 worth of new equipment will be installed in the former syrup plant which was used during the war by the War Relocation Authority as a storage warehouse for the furniture of displaced Japanese.

The plant, built in 1927 at a reported cost of \$172,000 exclusive of equipment, was operated for its original purpose until 1928. It then was taken over by the Farm Credit Administration through the United States Treasury Department along with other properties of the cooperative in a transfer which reduced the association's debt to an amount approximating the value of its operative holdings.

## Foundry Nears Completion Of Expansion

A \$250,000 expansion project which started four years ago will be completed about the first of the year by the Valley Foundry and Machine Works.

Construction is under way on the last unit, a \$125,000 machine shop, stockroom and office at 2718 East Avenue.

Leon S. Peters, the owner of the firm, said the net result will be one of the most modern foundries in the San Joaquin Valley.

He added the operations at 710 H Street, where the company has been located since 1939 when he took over the business, will be transferred to the East Avenue location.

Peters explained the steady growth of the business, the need to get away from the downtown district because of parking and other problems and the smoke nuisance created by the foundry within the city limits prompted the move.

The reinforced concrete building under construction will be 180 by 240 feet. It will contain a machine shop, 80 by 240, a stockroom, 60 by 240, and an office, 40 by 140 feet. Air conditioning will be provided.

J. T. Cowan is the builder.

The 10 acre tract was purchased in October, 1946. The fabrication plant, the first unit in the program, was completed in October, 1948. The pattern works was occupied early this year. The firm was established in 1898.

## Chamber Sets Meeting

Directors of the Fresno County and City Chamber of Commerce will meet Thursday noon in the new temporary offices at 1745 Mono Street for a luncheon.

President C. W. Richard Atkins said plans will be discussed for the eventual removal of the chamber to permanent quarters at Fresno and N Streets after the present St. James' Episcopal Cathedral property is relinquished.

Mrs. F. A. Guerard and Herbert Strentz, Fresno State College students who served internship with the chamber for college credits, will be introduced.

Dr. McKee Fisk, head of the

FSC business division, will present Donald A. Fultz with a fellowship award from the California Association of Chamber of Commerce managers.

## Young Driver Hurt

Paul Belmontez, 14, of Pa-coima, Los Angeles County, is under treatment for a back injury suffered when the automobile he was driving went out of control and overturned on a private road on the Hawkins Ranch in the Five Points district at 11:30 AM yesterday. He was treated in the Fresno County General Hospital.

VALLEY FOUNDRY & MACHINE WORKS INC.

**FRESNO**  
Diamond Jubilee  
1960

**BACK BEFORE THE TURN OF THE CENTURY,** starting in a small shop on Broadway, **Valley Foundry & Machine Works** had its humble beginning. Then, but thirteen years old, the city of Fresno with a population of less than 15,000 was little more than a struggling frontier community. Through wars, the difficult periods in our economy, as well as periods of fabulous prosperity, it has been our constant effort to keep pace with the growing needs of our great and expanding agricultural and industrial area.

**TODAY . . .** as in those early years of our founding, each one of us at **Valley Foundry & Machine Works** has a strong and proud feeling of obligation to the great community that we serve. Through our spacious plant and modern facilities we are busy meeting that challenge, not only for our immediate area, but also for the many customers we serve in every state in America and in many foreign countries. To the wonderful city of Fresno on her diamond jubilee, we say "Thanks for giving us the privilege to grow with you."

## Fresno Linen Service Plans \$1 Million Plant

Construction is scheduled to start the middle of next month on a new \$1 million plant for the Fresno Linen Service on a five acre site at 422 South Fruit Avenue.

The one story building will cost \$500,000 and the equipment will represent another \$500,000 expenditure.

Jack H. Kelley, manager of the industrial laundry's present plant at 760 H Street, said the project will be completed in eight months.

Construction will be of concrete and steel. The plant will have 120 employees. Jackson and Edney Construction Company of Ft. Lauderdale, Fla. is the contractor.

Kelley said the Fresno plant is one of 54 operated nationally by the parent company, National Linen Service of Atlanta, Ga.

The company purchased the Liberty Towel & Linen Supply Company on H Street in 1961 for \$900,000 and since then has been making plans for the expansion program.

Date	6/28/1963
Search Term	760 H Street

Comments	Article referencing the relocation of the laundry business that existed on property to northeast from 1903-1964 to a new location.

## DEVELOPMENT

### Chamber Lists New Businesses In Fresno Area

A series of new businesses which will feature the distribution end of commerce have opened in Fresno. This is reported in the current issue of *Plants, Payrolls And Progress*, a quarterly publication of the industrial department of the Fresno County and City Chamber of Commerce.

Oscar Spano, chairman of the chamber's industrial committee, said seven firms specializing in distribution have been added to the overall Fresno economy.

These are the Fresno Tire Warehouse, Inc., at 1206 G Street; Marshall Wells Company, 115 Van Ness Avenue; Refrigeration Supplies Distributor of 2208 East McKinley Avenue; Continental Sales, Inc., 844 U Street; RPM Chemical Corporation, 704 North Maple Avenue; Butler-Johnson Corporation, 735 H Street, and Western Spray Chemical Corporation, 11841 South Henderson Avenue, Caruthers.

The new industries have created 26 new jobs and represent a capital investment of \$730,000, the journal reports.

During the second quarter just ended, there also were five business expansions which added 90 workers. The growth represents an investment of \$960,000.

Total new industries in Fresno this year have amounted to eight and have

RE: PUBLIC RECORDS REQUEST of June 23, 2022, Reference # R019875-062322.

Dear Alisha Harper,

The City of Fresno (City) received your public records request under the California Public Records Act (Gov. Code, § 6250 et seq.) on June 23, 2022. Your request seeks:

*Any documentation pertaining to building permits, certificates of occupancy, utilities, above ground storage tanks, below ground storage tanks, hazardous materials/waste storage, disposal, or release, permits to operate, or notices of violation or infraction associated with 735 739 741 H Street.*

The City responds as follows:

The City has located records responsive to your request and has determined that some of the information is exempt from disclosure under the Public Records Act (Gov. Code, § 6250 et. seq.) for the following reasons:

- The request seeks records that contain information protected by a constitutional right to privacy (Gov. Code, § 6254(k); U.S. Const., 14th Amend.; Cal. Const. Art. I, § 1).

The City has redacted exempt information and/or records.

Please log in to the City's Public Records Center at the following link to retrieve the appropriate responsive records, uploaded into the system as: 735\_739\_741\_H\_Street\_-\_Fire\_Inspection\_Summary-Code\_Violations\_Redacted.

[City Public Records Request - R019875-062322](#)

Please feel free to contact the Fresno City Attorney's Office at 559-621-7500 if you have any questions.

Very truly yours,

Ricardo Farfan  
Paralegal  
for  
TRAVIS R. STOKES  
Assistant City Attorney  
City of Fresno

Inspection Date: **8/26/2021** By: Erickson, Wynter (17085)

Time In: **11:00** Time Out: **11:30**

Form: 06 Fire Inspection  
Form 18.9

Authorized Date: **08/26/2021** By: Erickson, Wynter (17085)

## Inspection Description:

Based on the 2019 California Fire Code with City of Fresno local amendments.

## Inspection Topics:

### California Fire Code Chapter 5 - Fire Service Features

CFC 505.1 Premises identification., FMC 10-50505.1 Address Identification.

New and existing buildings shall be provided with approved address identification. The address identification shall be legible and placed in a position that is visible from the street or road fronting the property. Address identification characters shall contrast with their background. Address numbers shall be Arabic numbers or alphabetical letters. Numbers shall not be spelled out. Each character shall be not less than 4 inches high with a minimum stroke width of 1/2 inch, unless larger characters are specified by Development and Resource Management Policy 02.111 and/or G-002. Where required by the fire code official, address identification shall be provided in additional approved locations to facilitate emergency response. The requirements of Fresno Municipal Code Section 12.1300 e, seq. shall be followed. Where access is by means of a private road and the building cannot be viewed from the public way, a monument, pole or other sign or means shall be used to identify the structure. Address identification shall be maintained.

**Status: FAIL**

**Notes: The address numbers are not visible due to the door that they are located on being boarded up. Apply the address numbers to the exterior of the building and ensure that they are always visible from the street and that they are contrast in color to the building to ensure proper identification for emergency personnel.**

### California Fire Code Chapter 7 - Fire-Resistance-Rated Construction

CFC 703.1 Fire and Smoke Protection Features - Maintaining protection

Materials and firestop systems used to protect membrane and through penetration in fire-resistance-rated construction and construction installed to resist the passage of smoke shall be maintained. The materials and firestop systems shall be securely attached to or bonded to the construction being penetrated with no openings visible through or into the cavity of the construction. Where the system design number is known, the system shall be inspected to the listing criteria and manufacturer's installation instructions.

**Status: FAIL**

**Notes: The ceiling and walls throughout the property were observed damaged. Repair the drywall or sheet rock so that the integrity of the building is maintained.**

### California Fire Code Chapter 9 - Fire Protection Systems

CFC 901.6 General Requirements - Inspection, testing and maintenance - Fire Sprinkler System Five Year Test Required.

Fire extinguishing systems shall be serviced every five years. Obtain a permit from the City of Fresno Fire Department and ensure the five year fire sprinkler system test is completed by a California Contractor State License Board - licensed C-16 contractor or equivalent. CCR T:19.

**Status: FAIL**

**Notes: Our records indicate that the fire sprinkler system was not certified following its most recent five year conducted in 2019. Contact a C-16 licensed fire sprinkler contractor to correct the deficiencies noted in the most recent five year test and certify the system. Once certified, send documentation to wynter.erickson@fresno.gov to update fire department records.**

**03/27/2019**    **GN GENERAL  
NOTES**

**Status:** COMPLETED    **Assigned Staff:** Alex French    **Time:** 0.01

**Description:** General Note

Kerri Donnis from FFD has put in several request for this property. I have attempted to make contact with her to let her know that this issue is to be done through HTF. HTF already knows that this is a hot spot for homeless and have it on a rotation schedule. I will monitor the area and inform HTF of any problems.

Union Pacific RR Co #872-10-53BB-83 Por  
10031 Foothill Blvd  
Roosevelt, CA 95747

Dear Property Owner:

**SUBJECT: NOTICE OF PUBLIC NUISANCE SUMMARY ABATEMENT/BILLING**

Address: 741 H ST Case #: E19-07941  
APN: 467-040-23ST Invoice #: 552636

Your property was recently inspected by the Code Enforcement Division and found to have violations of the Fresno Municipal Code ("FMC"). These violations created a public nuisance imminently dangerous to life, health and public safety. These conditions have been removed or otherwise abated, and you are being billed for this expense pursuant to FMC 10-609.(a)(b)(c), 615 and 1-304 et seq. Listed below are the violations, corrective action taken by the City, and the costs incurred.

**VIOLATION:** Open vacant structure. FMC 10-605(f)

**CORRECTIVE ACTION(S):** Open windows and/or doors were secured using lexan and/or plywood. (Date of Action 8/16/19, W.O. #19-08028, Inv. #16601)

**COSTS:**

Administrative Costs	\$250.00
Contractor Costs	\$240.00
Total Due	\$490.00

**PLEASE PAY THIS NOTICE/BILLING WITHIN 30 DAYS. NO INVOICE WILL BE SENT.**

The owner and/or occupant may contest this action by filing an appeal to the Hearing Officer (FMC §§ 1-407 et seq.). The appeal must be received by the Hearing Officer within 15 days of the service of this notice. The appeal shall be made in writing and filed with the Office of the City Manager located on the second floor of City Hall, 2600 Fresno Street Room 2064, Fresno, CA 93721, (559)621-7766. There is an Administrative Hearing Fee of \$35 for residential units up to two, \$55 for three or more units and \$75 for commercial units. Please bring or send a check or money order with the appeal form. If payment is not included with the appeal form you will be billed. Please be advised that if the Notice and Order is upheld on appeal the City may recover enforcement costs including, but not limited to, costs incurred in investigating and defending the Notice and Order on appeal. Enforcement costs incurred by the City are recoverable even if the code violations(s) is corrected by the property owner and/or beneficiary of record.

PLEASE NOTE that should you fail to pay these charges in full within either 30 days from the date of mailing or one business day after an appeal hearing, the City may seek collection through any of the following means: (1) a collection agency; (2) a lien; (3) property assessment, and/or (4) legal action. (FMC 1-501 et seq). Before a lien or special assessment would be placed on your property, an administrative hearing officer will confirm the costs by a public hearing. You will receive notice of the hearing at least fifteen days prior to the date of the hearing and will be allowed to file an objection. A late fee of 1.5% of a minimum of \$1.00 will be assessed to all outstanding balances after 30 days. **IMPORTANT:** This Notice will be recorded with the County Recorder's Office, but not before 7 calendar days from the date of mailing. The cost to release said document is \$60.00.

Appointments are required if you want to meet directly with the Inspector.

(FMC 1-501 et seq). Before a lien or special assessment would be placed on your property, an administrative hearing officer will confirm the costs by a public hearing. You will receive notice of the hearing at least fifteen days prior to the date of the hearing and will be allowed to file an objection. A late fee of 1.5% of a minimum of \$1.00 will be assessed to all outstanding balances after 30 days. **IMPORTANT:** This Notice will be recorded with the County Recorder's Office, but not before 7 calendar days from the date of mailing. The cost to release said document is \$60.00.

Appointments are required if you want to meet directly with the Inspector.

CITY OF FRESNO PARKING DIVISION  
2600 FRESNO ST  
FRESNO, CA 93721

Dear Property Owner:

**SUBJECT: NOTICE OF PUBLIC NUISANCE ABATEMENT/BILLING**

Address: 735 H ST Case #: E19-07941  
APN: 467-040-23ST Invoice #: 555584

Your property was recently inspected by the Code Enforcement Division and found to have violations of the Fresno Municipal Code ("FMC"). These violations created a public nuisance imminently dangerous to life, health and public safety. These conditions have been removed or otherwise abated, and you are being billed for this expense pursuant to FMC 10-609.(a)(b)(c), 615 and 1-304 et seq. Listed below are the violations, corrective action taken by the City, and the costs incurred.

**VIOLATION:** Open vacant structure. FMC 10-605(f)

**CORRECTIVE ACTION(S):** Open windows and/or doors were secured using lexan and/or plywood. (Date of Action 10/7/19, W.O. #19-10008, Inv. #16793)

<b>COSTS:</b>	Administrative Costs	\$100.00
	Contractor Costs	\$533.00
	Total Due	\$633.00

**PLEASE PAY THIS NOTICE/BILLING WITHIN 30 DAYS. NO INVOICE WILL BE SENT.**

The owner and/or occupant may contest this action by filing an appeal to the Hearing Officer (FMC §§ 1-407 et seq.). The appeal must be received by the Hearing Officer within 15 days of the service of this notice. The appeal shall be made in writing and filed with the Office of the City Manager located on the second floor of City Hall, 2600 Fresno Street Room 2064, Fresno, CA 93721, (559)621-7766. There is an Administrative Hearing Fee of \$35 for residential units up to two, \$55 for three or more units and \$75 for commercial units. Please bring or send a check or money order with the appeal form. If payment is not included with the appeal form you will be billed. Please be advised that if the Notice and Order is upheld on appeal the City may recover enforcement costs including, but not limited to, costs incurred in investigating and defending the Notice and Order on appeal. Enforcement costs incurred by the City are recoverable even if the code violation(s) is corrected by the property owner and/or beneficiary of record.

PLEASE NOTE that should you fail to pay these charges in full within either 30 days from the date of mailing or one business day after an appeal hearing, the City may seek collection through any of the following means: (1) a collection agency; (2) a lien; (3) property assessment, and/or (4) legal action. (FMC 1-501 et seq). Before a lien or special assessment would be placed on your property, an administrative hearing officer will confirm the costs by a public hearing. You will receive notice of the hearing at least fifteen days prior to the date of the hearing and will be allowed to file an objection. A late fee of 1.5% of a minimum of \$1.00 will be assessed to all outstanding balances after 30 days. **IMPORTANT:** This Notice will be recorded with the County Recorder's Office, but not before 7 calendar days from the date of mailing. The cost to release said document is \$60.00.

Appointments are required if you want to meet directly with the Inspector.

<b>08/16/2019</b>	<b>Inspection Resulted</b>	<b>Inspection Type:</b> Initial Inspection <b>Time:</b> 8:30 AM-2:00 PM <b>Total Time:</b> 5.50 <b>Status:</b> In Violation - Summary Abateme <b>Inspector:</b> George Valdes <b>Result Comments:</b> I was contacted By FFD Wilder who related The structure at 741 H street was open and vacant. On 8-16-19 at 0830 I arrived at the subject property and confirmed the structure was open. I observed two large sliding doors to be pried open and one of them to have a tree branch stuck in it. I contacted Esko Siipola and requested he attempt to locate a responsible party. Esko related the building was owned by the City of Fresno and he would attempt to locate someone from Facilities to respond. I requested assistance from the Fresno Police Department in order to clear the large warehouse type building. Officers arrived along with John Lowe of the Public Works Department. Mr. Lowe phone 621- 1240 had a key to unlock the pedestrian door. Officer cleared the building. I contacted Camile and requested a board-up contractor refer invoice number 19-08028. Sequoia western subsequently arrived and secured the openings.I obtained before and after pictures .

CASE HISTORY REPORT  
CASE NUMBER E19-07941

**10/25/2019**      **Inspection Resulted**      **Inspection Type:** Follow-Up Inspection **Time:** - **Total Time:**  
**Status:** In Violation - Abatement      **Inspector:** Nickolas Gonzales  
**Result Comments:** I was notified by Inspector Esko Siipola 733 H St building is open / vacant.  
Esko and a Fresno PD unit cleared the vacant building. I arrived at approximately 3:00pm.  
Fresno PD was still at the property. In my research I showed Union Pacific Railroad as the  
property owner and contacted the emergency line (888-877-7267), to verify if this was one of  
there properties and if they could secure the building. The operator said he would call me back if  
it was there property and see about sending someone out. After further research I identified Mr.  
Lowe as the property manager and would later notify him about the property.

I verified the opening and attempted to close the double doors to secure it with a lock and chain.  
Unsuccessful, I requested PO19-10033 for Sequoia Western to secure the doors. Our contractor  
said he was unable to secure the property today and asked if he could do the work the next  
morning 10/26/2019. I agreed. I also contacted Mr. Lowe at City of Fresno Public Works and  
notified him the building is open/vacant, and our contractor would be there at the property  
10/26/19 to secure the opening.

**GRANT DEED**

FOR VALUE RECEIVED, UNION PACIFIC RAILROAD COMPANY, a Delaware corporation (formerly known as Southern Pacific Transportation Company, successor by merger to Southern Pacific Company, successor by merger to Central Pacific Railway Company) ("Grantor"), grants to JOHN C. COLEMAN, JR., <sup>a single man</sup> ~~an individual~~ ("Grantee"), all of its rights, title, and interest in and to that certain real property (the "Property") situated in the City of Fresno, County of Fresno, State of California, described in **Exhibit A** attached hereto and incorporated by reference.

EXCEPTING from this grant and RESERVING unto Grantor, its successors and assigns, forever, all minerals and all mineral rights of every kind and character now known to exist or hereafter discovered, including, without limiting the generality of the foregoing, oil and gas and rights thereto, together with the sole, exclusive and perpetual right to explore for, remove and dispose of said minerals by any means or methods suitable to Grantor, its successors and assigns, but without entering upon or using the surface of the Property, and in such manner as not to damage the surface of said lands or to interfere with the use thereof by Grantee, its successors or assigns.

**THE PROPERTY IS CONVEYED TO GRANTEE SUBJECT TO:**

- A. All liens, encumbrances, easements, covenants, conditions and restrictions of record;
- B. All matters which would be revealed or disclosed in an accurate survey of the Property;

IN WITNESS WHEREOF, the undersigned has executed this Deed as of  
October 26, 2000.

Attest:

UNION PACIFIC RAILROAD COMPANY,  
a Delaware corporation

Barbara Holder

ACCEPTED this \_\_\_\_\_ day of \_\_\_\_\_, 2000.

\_\_\_\_\_  
JOHN C. COLEMAN, JR.

STATE OF NEBRASKA )  
 )  
COUNTY OF DOUGLAS )

On October 26, 2000, before me, a Notary Public in and for said County and State, personally appeared R.D. UHRICH and Barbara Holder, Assistant Vice President and Assistant Secretary, respectively, of UNION PACIFIC RAILROAD COMPANY, a Delaware corporation, personally known to me (or proved to me on the basis of satisfactory evidence) to be the persons whose names are subscribed to the within instrument, and acknowledged to me that they executed the same in their authorized capacities, and that by their signatures on the instrument the persons, or the entity upon behalf of which the persons acted, executed the instrument.

WITNESS my hand and official seal.

Donna M. Coltrane  
Notary Public

**RESOLUTION 2018-100**

A RESOLUTION OF THE COUNCIL OF THE CITY OF FRESNO, CALIFORNIA, TO DEDICATE A PORTION OF CITY-OWNED PROPERTY FOR WATER MAIN EASEMENT PURPOSES, LOCATED ON THE INYO STREET ALIGNMENT, WEST OF "H" STREET

2. Nothing contained in this resolution shall be deemed or interpreted by any party to cause any interest created in the public pursuant to this resolution to ripen into any title, interest or right of the public against or adverse to the rights of the City of Fresno nor shall this resolution limit, restrict or modify the exemption of public property to title by prescription as defined within California Civil Code Section 1007.

3. The City Clerk of the City of Fresno shall certify to the passage of this resolution and attest thereto under the seal of the City of Fresno.

4. The City Engineer shall cause a City deed number to be assigned to this resolution and shall cause this resolution to be recorded in the Office of the Recorder of the County of Fresno, California. The original resolution shall be returned to the City Clerk after recordation and a certified copy thereof shall be filed in the Public Works deed file.

**EXHIBIT "A"**

**LEGAL DESCRIPTION OF EASEMENT**

APN 467-040-20, -22

A portion of Sections 9 and 10, Township 14 South, Range 20 East, Mount Diablo Base and Meridian according to the Official United States Government Township Plats thereof, in the City of Fresno, County of Fresno, State of California, being a portion of the land shown as Railroad Reservation on the Map of the Town of Fresno recorded in Book 1 of Plats at Pages 1, 2 and 3, Fresno County Records, more particularly described as follows:

A 30-foot wide strip of land, lying 15 feet on each side of the following described centerline:

**COMMENCING** at the intersection of the southwesterly projection of the centerline of Kern Street with a line that is parallel with and 250 feet southwesterly from the southwesterly line of "H" Street, as said streets are shown on said Map of the Town of Fresno; thence southeasterly, parallel with and 250 feet southwesterly from the southwesterly line of "H" Street, a distance of 493.82 feet to the **POINT OF BEGINNING** of the described centerline; thence northeasterly a distance of 250 feet to a point on said southwesterly line of "H" Street, last said point being 493.82 feet southeasterly from the intersection of said southwesterly line of "H" Street with said southwesterly projection of the centerline of Kern Street, and last said point being the **TERMINUS** of this centerline.

The sidelines of this strip of land are to begin with a line that is parallel with and 250 feet southwesterly from the southwesterly line of "H" Street and are to terminate on said southwesterly line of "H" Street.

Containing 7,500 square feet more or less of land.

END DESCRIPTION

This legal description was prepared by me or under my direction in accordance with the Professional Land Surveyors Act.

SENT E-MAIL TO MANAGEMENT WITH PHOTOS.

Erica, Tim,

Desi asked me to take a look at this one.

This location is a City property, there is damage to the roof as well as the fascia boards in 3 locations. It does not appear to be in any immediate danger of collapsing, but does need to be addressed.

How would you like to proceed?

**Status:** COMPLETED **Assigned Staff:** Howard Lacy **Time:** .1  
**Description:** ADDITIONAL E-MAIL  
SENT ADDITIONAL E-MAIL.

SR States it belongs to Union Pacific Railroad, however, it was used as storage for Parking as well as other divisions. I know this because I have been sent to property when it was open, and Del handled getting it secured.

GIS shows UPRR as the owner, Metroscan does not show the APN. and Frontcounter shows all owner info blank like all other City owned properties.

**Subject:** Public Records Request

Hello,

I need to request records for a property in Fresno located at 735, 739, and 741 H Street, Fresno, CA. The parcel associated with this property is 467-040-23ST. This parcel is located at the west corner of H Street and Mono Street in Fresno. I have also attached a parcel map to aid in identification; the property of interest is outlined in green near the center of the image below.

I am interested in any records pertaining to above ground storage tanks, below ground storage tanks, hazardous materials/waste storage, disposal, or release, permits to operate, or notices of violation or infraction (pertaining to environmental matters) associated with this property.

Thank you for your help with this.
