

WATER MAINTENANCE MECHANIC TECHNICIAN**DEFINITION**

Under supervision, participates, services, and assists in the maintenance, repair, installation, replacement, and construction of mechanical components of the City's water systems and facilities.

SUPERVISION RECEIVED/EXERCISED

Receives supervision from a manager or designee. Exercises no supervision.

DISTINGUISHING CHARACTERISTICS

Water Maintenance Mechanic Technician is the entry level class in the Water Maintenance Mechanic series. Incumbents perform semiskilled duties in the maintenance, repair, installation, and replacement of mechanical components of the water system infrastructures. This class is distinguished from Water Maintenance Mechanic Specialist in that incumbents of the latter are the advanced working level class in which incumbents are expected to perform more complex and skilled duties with greater independence, and may provide lead instruction. Incumbents may be required to work evenings, weekends, and holidays.
