16	Public Works	Estimated One-Third Share of HAWK traffic signal on Maroa Ave, between Barstow Ave and Bullard Ave	<p>Council Vice President Maxwell wanted to request another estimate regarding the installation of a HAWK traffic signal on Maroa Ave, between Barstow Ave and Bullard Ave.</p> <p>We have been in discussions with Fresno Unified School District and the County of Fresno about potential funding opportunities for this project, and we would like to know the estimated one-third share of the total project cost from the City's side.</p> <p>We are unsure whether the Department of Public Works has already developed an estimate, but it is our understanding that staff may have been looking into the City's projected contribution.</p>	4 - Tyler Maxwell	5/28/2026	6/8/2026
17	General Services	Mother's Room Improvements at City Hall	<p>Councilmember Maxwell would like to explore potential improvements to the existing Mother's Room at City Hall. While the current space is thoughtful, our office would like to explore furniture, and room upgrades to help make the space more functional, comfortable, and accessible for employees.</p> <p>Currently, the room is designed to mostly support single-person use. We would like to explore what options may be available to make this space more accommodating for multiple users at the same time while still of course maintaining privacy for its users. Some of the potential improvements we are interested in learning more about would be: Purchasing new multi-use furniture, or recliners or seating spaces that offer pull outs or extended areas or tables for placing personal items; Privacy solutions to help maximize the space for multiple users at a time, such as ceiling-mounted privacy curtains; We would like to explore installing maybe 3 "spaces" within the room, separating the spaces with privacy curtains or partitions, and providing each space with its own furniture (chair, small table, etc.) so the room can be used by up to 3 people at a time; Potential sink installation – adding a sink or set of sinks to a general use area of the room, if it is possible to gain access to a water source in that room; Installation of a fridge; Improved general storage or surface space (tables, cubbies, etc.) for personal items and pumping equipment – potentially small locker spaces to maintain privacy; Easier access to the space. Currently users must ask security to unlock the area for them. We would like to explore if a badge-in system would be more appropriate, especially if the space becomes multi-use.</p> <p>Our office would like to better understand what options are available to us so that we can begin developing a formal plan and understand what of the above upgrades we can realistically consider, depending on the limitations of the space and the administrative process. We would appreciate being made aware of: Any building or facilities limitations for the space (if access to a water source for a sink is possible, badge access installation, making it multi-use with ceiling-mounted curtain tracks or other partitions); Procurement or approval processes that may apply to altering the room or purchasing items for the room; Whether certain improvements would require specific approval from other departments such as Facilities or Human Resources/Personnel; Recommended next steps for what we need to be able to further develop the project and a realistic budget amount to cover the cost of these upgrades.</p>	4 - Tyler Maxwell	5/28/2026	6/10/2026
18	PARCS	Design and construction costs for recreational equipment at Basin V Park	<p>Council Vice President would like a request for information for the following project: Design and construction costs for recreational equipment at Basin V Park (1733 N Sierra Vista Ave, Fresno, CA 93703; located at the northeast corner of McKinley Ave and Sierra Vista Ave).</p>	4 - Tyler Maxwell	5/29/2026	6/5/2026
